

period must be within 1.0 [degrees] F (0.6 [degrees] C) of the test period temperature average for each compartment. Make this determination for the fresh food compartment for the fresh food compressor cycles closest to the start and end of the test period. If multiple segments are used for test period 1, each segment must comply with above requirement.

Steady State for EP2i:

The second (defrost) part of the test must be preceded and followed by regular compressor cycles. The temperature average for the first and last compressor cycle of the test period must be within 1.0 [degrees] F (0.6 [degrees] C) of the EP1 test period temperature average for each compartment.

Test Period for EP2i, T2i:

EP2i includes precool, defrost, and recovery time for compartment i, as well as sufficient dual compressor steady state run cycles to allow T2i to be at least 24 hours. The test period shall start at the end of a regular freezer compressor on-cycle after the previous defrost occurrence (refrigerator or freezer). The test period also includes the target defrost and following regular freezer compressor cycles, ending at the end of a regular freezer compressor on-cycle before the next defrost occurrence (refrigerator or freezer). If the previous condition does not meet 24 hours time, additional EP1 steady state segment data could be included. Steady state run cycle data can be utilized in EP1 and EP2i.

Test Measurement Frequency
Measurements shall be taken at regular interval not exceeding 1 minute.

The waiver should continue until DOE adopts an applicable amended test procedure.

LG also requests an interim waiver for its testing and rating of the foregoing models. The petition for waiver is likely to be granted, as evidenced not only by its merits, but also because DOE has granted such a waiver and interim waiver to Sub-Zero. Hence, grant of an interim waiver for LG is appropriate.

We would be pleased to discuss this request with DOE and provide further information as needed.

LG requests expedited treatment of the Petition and Application. In that regard, DOE states in its March 7, 2011 notice concerning its certification, compliance and enforcement rule, "The Department renews its commitment to act swiftly on waiver requests." 76 Fed.

Reg. 12422, 12442.² LG appreciates this commitment by DOE.

We hereby certify that all manufacturers of domestically marketed units of the same product type have been notified by letter of this petition and application, copies of which letters are set forth in Appendix II hereto.

Sincerely,
John I. Taylor,

Appendix I

The waiver and interim waiver requested herein should apply to testing and rating of the following model series of refrigerator-freezers. Please note that the actual model numbers will vary to account for such factors as year of manufacture, product color, or other features. Nonetheless, they will always have dual compressors.

Re: Petition for Waiver and Application for Interim Waiver, *Test Procedure for Refrigerators, Refrigerator-Freezers, and Freezers*

Dear Assistant Secretary Danielson:

LG Electronics, Inc. (LG) hereby respectfully amends its May 10, 2012 Petition for Waiver and Application for Interim Waiver, pursuant to 10 C.F.R. § 430.27, as related to DOE's test procedure for refrigerators, refrigerator-freezers, and

freezers. 10 C.F.R. Part 430, Subpart B, Appendix A1. Specifically, LG requests that DOE grant a waiver that would provide for its dual compressor products set forth in Appendix I hereto (rather than the products set forth in Appendix I to its May 10, 2012 submission).

Thank you for consideration of LG's waiver request.

Sincerely,
John I. Taylor,
Vice President, Government Relations and Communications, LG Electronics USA, Inc., 1776 K Street NW., Washington, DC 20006, Phone: 202-719-3490, Fax: 847-941-8177, Email: john.taylor@lge.com.
