Natural Currents Energy Services, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On May 22, 2012, Natural Currents Energy Services, LLC filed an application, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the Alexandria Bay Hydroelectric Project, which would be located on the St. Lawrence River in Jefferson County, New York. The proposed project would not use a dam or impoundment. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of: (1) Installation of 50 NC Sea Dragon tidal turbines at a rated capacity of 100 kilowatts, (2) an estimated 2.5 kilometers in length of additional transmission infrastructure, and (3) appurtenant facilities. Initial estimated production would be a minimum of 17,520 megawatt hours per year with the installation of 50 units.
