SUPPLEMENTARY INFORMATION: The Occupational Exposure to Hazardous Chemicals in Laboratories Standard applies to laboratories that use hazardous chemicals in accordance with the Standard's definitions for "laboratory use of hazardous chemicals" and "laboratory scale." The Standard requires that these laboratories maintain worker exposures at or below the permissible exposure limits specified for the hazardous chemicals in 29 CFR part 1910, subpart Z. They do so by developing a written Chemical Hygiene Plan (CHP) that describes standard operating procedures for using hazardous chemicals; hazard-control techniques; equipment-reliability measures; worker information-and-training programs; conditions under which the employer must approve operations, procedures, and activities before implementation; and medical consultations and examinations. The CHP also designates personnel responsible for implementing the CHP and specifies the procedures used to provide additional protection to workers exposed to particularly hazardous chemicals.

Other information collection requirements of the Standard include documenting exposure monitoring results; notifying workers in writing of these results; presenting specified information and training to workers; establishing a medical surveillance program for overexposed workers; providing required information to the physician; obtaining the physician's written opinion on using proper respiratory equipment; and establishing, maintaining, transferring, and disclosing exposure monitoring and medical records. These collection of information requirements, including the CHP, control worker overexposure to

hazardous laboratory chemicals thereby preventing serious illnesses and death among workers exposed to such chemicals.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number.
