What should a tribe's notice of interest contain?

The Notice of Interest should include the tribe's name and the name and telephone number of a contact person.

Are quality assurance and quality control (QA/QC) required for application?

Yes. Three specific QA/QC requirements must be met to comply with EPA's performance criteria for grants:

(1) Applicants must submit documentation that describes the quality system implemented by the state, territory, tribe, or local government. Documentation may be in the form of a Quality Management Plan or equivalent documentation.

(2) Applicants must submit a quality assurance project plan (QAPP) or equivalent documentation.

(3) Applicants are responsible for submitting documentation of the quality system and QAPP for review and approval by the EPA Quality Assurance Officer or his designee before they take primary or secondary environmental measurements. More information about the required QA/QC procedures is available in Chapter Four and Appendix H of *National Beach Guidance and Required Performance Criteria for Grants* (EPA-823-B-02-004).

Are there reporting requirements?

Recipients must submit annual performance reports and financial reports as required in 40 CFR part 31, the Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments (40 CFR 31.40 and 31.41). As required by Section 31.40, the annual performance report includes a comparison of actual accomplishments to the objectives established for the year and the reason for any slippage if established objectives were not met. It should also describe how the grant funds were used to implement the program to meet the performance criteria listed in *National Beach Guidance and Required Performance Criteria for Grants* (EPA-823-B-02-004). The annual performance report required under 40 CFR 31.40 is due no later than 90 days after the grant year ends.

Recipients must also submit annual monitoring and notification reports. The contents of these reports are described in the *National Beach Guidance and*

Required Performance Criteria for Grants (EPA-823-B-02-004). Sections 2.2.3 and 4.3 of the document contain the performance criterion requiring an annual monitoring report, and sections 2.2.8 and 5.4 contain the performance criterion requiring an annual notification report. These annual monitoring and notification reports required to be submitted by States to EPA under CWA section 406(b)(3)(A) and by all grant recipients under the *National Beach Guidance and Required Performance Criteria for Grants*, include data collected as part of a monitoring and notification program. As a condition of award of an implementation grant, EPA requires that the monitoring report and the notification report for any beach season be submitted not later than January 31 of the year following the beach season. (See Section II, Funding and Eligibility, above.)

What regulations and omb cost circular apply to the award and administration of these grants?

The regulations at 40 CFR Part 31 govern the award and administration of grants to states, tribes, local governments, and territories under CWA section 406(b). Allowable costs will be determined according to the cost principles outlined in 2 CFR Part 225.

SUPPLEMENTARY INFORMATION:

I. Information About IRIS

EPA's IRIS is a human health assessment program that evaluates quantitative and qualitative risk information on effects that may result from exposure to chemical substances found in the environment. Through the IRIS Program, EPA provides the highest quality science-based human health assessments to support the Agency's regulatory activities. The IRIS database contains information for more than 550 chemical substances that can be used to support the first two steps (hazard identification and dose-response evaluation) of the risk assessment process. When supported by available data, IRIS provides oral reference doses (RfDs) and inhalation reference concentrations (RfCs) for chronic noncancer health effects and cancer assessments. Combined with specific exposure information, government and private entities use IRIS to help characterize public health risks of chemical substances in a site-specific situation and thereby support risk

management decisions designed to protect public health.
