

sample collection teams for collecting N-60 samples in establishments. FSIS has concluded that the Agency does not have the resources to implement this recommendation. The use of the specialized sample collection teams would be cost-prohibitive.

2012 OIG Audit Report

In a more recent audit, reported in May 2012, OIG studied the variation of the beef industry's *E. coli* O157:H7 sampling and testing protocols among slaughter plants, and how FSIS and the beef industry use the test results to improve food safety.⁵ OIG found that the beef industry was conducting thousands of tests daily and generally complying with FSIS's guidance for how to perform those tests.

OIG made several additional recommendations to FSIS, and the Agency has already responded to some of them. For example, OIG recommended that FSIS issue guidance for industry on sampling and how the industry might plan for and react to high-event periods (HEPs)—when slaughter establishments have a high rate of positive test results for *E. coli* O157:H7 or other STEC or virulence markers in trim samples.

On May 7, 2012, FSIS announced the availability of compliance guidance for establishment sampling and testing for Shiga toxin-producing *E. coli* (STEC) organisms or virulence markers (77 FR 26725). This guidance includes criteria that establishments can use to determine if they are experiencing an HEP. The document explains that extensive sampling of trimmings and careful evaluation of test results can help establishments identify places in their processes where controls are poor, and where they can take corrective actions. It recommends that establishments continually strive to reduce the percentage of test results that are positive for *E. coli* O157:H7 (or STEC organisms or virulence markers).

During an HEP, adulteration may be more widespread than a positive-testing lot of product may indicate. By following the guidance and withholding adulterated product from commerce during HEPs, establishments are more likely to avoid costly recalls. While establishments can use the guidance now, FSIS requested comments on it and will update it as necessary in response to the comments.

OIG also recommended that FSIS re-evaluate and improve its policies on inspector collection of trim samples by, for example, ensuring that inspectors randomly select product for sampling, ensuring that inspectors collect samples of proper weight, and ensuring that they do not take multiple samples from single pieces of trim.

To ensure that all raw ground beef, beef manufacturing trimmings, and bench trim samples are the necessary weight, FSIS recently issued instructions to inspection program personnel on the use of new sample collection bags that have fill-lines.⁶ In addition, in response to other recommendations, FSIS will evaluate its instructions for sampling and determine what other changes may be needed.

OIG recommended that FSIS improve communication with industry by issuing guidance to assist establishments in selecting laboratories according to the laboratories' testing capabilities. On March 8, 2012, FSIS announced the availability of guidance for establishments in the selection of commercial and private microbiological testing laboratories (77 FR 13999). The guidance includes a checklist for industry on the issues to consider and also the types of documents that establishments should maintain to support their testing programs.⁷ Establishments can use the guidance now. FSIS asked for comments on the guidance and will make any necessary changes to it after evaluating the comments.

OIG further recommended that FSIS determine whether to increase sampling of trim, assess its performance measures for *E. coli* O157:H7, clarify current instructions to inspection personnel in its directive on verification of controls for the pathogen (FSIS Directive 10,010.1), and assess the quality of inspection in Talmadge-Aiken establishments. FSIS is evaluating these issues and will respond to these recommendations.

Additional Public Notification

FSIS will announce this notice online through the FSIS Web page located at: http://www.fsis.usda.gov/regulations_&_policies/Federal_Register_Notices/index.asp.

FSIS will also make copies of this **Federal Register** publication available through the FSIS Constituent Update,

which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of information that could affect or would be of interest to constituents and stakeholders. The Update is communicated via Listserv, a free electronic mail subscription service for industry, trade groups, consumer interest groups, health professionals, and other individuals who have asked to be included. The Update is also available on the FSIS Web page. In addition, FSIS offers an electronic mail subscription service which provides automatic and customized access to selected food safety news and information. This service is available at http://www.fsis.usda.gov/News_&_Events/Email_Subscription/. Options range from recalls to export information to regulations, directives and notices. Customers can add or delete subscriptions themselves, and have the option to password protect their accounts.
