The SSC will convene on October 30th, 31st and November 1st, 2012, from 9 a.m. until 5 p.m., to discuss several issues related to the catch limits (ACLs). At the 143rd CFMC, it was reported that some ACLs are expected to be overrun in the US Caribbean.

The final Rule triggers accountability measures (AMs) if an ACL has been exceeded based on a moving multi-year average of landings. If the ACL for a species or species group is exceeded, the fishing season for the affected species will be reduced. The AM will be triggered unless NMFS SEFSC, in consultation with the CFMC and its SSC determine the ACL was exceeded because of enhanced data collection and monitoring efforts instead of an increase in total catch of the species or species group.

The SSC was charged with the determination of whether the numbers provided are a result of better data gathering or “real” overrun of the ACLs.

The meetings are open to the public, and will be conducted in English. Fishers and other interested persons are invited to attend and participate with oral or written statements regarding agenda issues.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-

Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council’s intent to take final action to address the emergency.

The MOU also provides for strengthening migratory bird conservation by identifying strategies that promote conservation and reduce adverse impacts on migratory birds through enhanced collaboration between NMFS and the FWS. In addition, This MOU identifies specific activities where cooperation between NMFS and the FWS, will contribute to the conservation of migratory birds and their habitat.
