Animal and Plant Health Inspection Service

Title: National Animal Health Monitoring System; Layers 2013 Study.
OMB Control Number: 0579–NEW.
Summary of Collection: Collection and dissemination of animal health data and information is mandated by 7 U.S.C. 391, the Animal Industry Act of 1884, which established the precursor of the Animal and Plant Health Inspection Service (APHIS), Veterinary Services (VS), the Bureau of Animal Industry. Legal requirements for examining and reporting on animal disease control methods were further mandated by 7 U.S.C. § 8308 of the Animal Health Protection Act, “Detection, Control, and Eradication of Diseases and Pests,” May 13, 2002. The National Animal Health Monitoring System (NAHMS) will initiate the second national data collection of table egg layers through Layers 2013. A *Samonella* Enteritidis working group was formed to identify areas where APHIS: VS should have a role in the prevention and control of *Samonella* Enteritidis on table eggs farms. This working group identified a need to update the information from the NAHMS Layers '99 study as well as a need for a current estimate of the prevalence of *Samonella* Enteritidis on table egg farms.

Need and Use of the Information: APHIS will use the data collected from the Layers 2013 study to: (1) Establish national production measures for producer, veterinary, and industry reference; (2) provide estimates of both outcome (disease or other parameters) and exposure (risks and components) variables that can be used in analytic studies in the future by APHIS; (3) provide input into the design of surveillance systems for specific diseases; (4) provide parameters for animal disease spread models.

Without this type of national data U.S.' ability to detect trends in management, production, and health status that increases/decreases farm economy either directly or indirectly would be reduced or nonexistent.
