

29762), and submitted the Information Collection Request (ICR) package to OMB. FDA subsequently entered into study design and development discussions with OMB officials. OMB decided that FDA should resubmit the

study with a new 60-day notice and begin a new ICR package. This document responds to that request. Substantial revisions to the scope and content of the survey were also made based on information presented at the

Antiparasitic Drug Use and Resistance in Ruminants and Equines Public Meeting (77 FR 7588, February 13, 2012; Docket No. FDA-2012-N-0102).

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN¹

Portion of study	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Pre-test	5	1	5	.5	2.5
Survey	650	1	650	.5	325
Total					327.5

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

FDA will conduct a pre-test of the survey with five respondents, and it is estimated that it will take 30 minutes (0.5 hour) to complete the pretest, for a total of 2.5 hours. We estimate that 650 respondents will complete the survey. It is estimated that it will take a respondent 30 minutes (0.5 hour) for a total of 325 hours. Thus, the total estimated annual reporting burden is 327.5 hours. FDA's burden estimate is based on prior experience with consumer surveys that are similar.
