SUPPLEMENTARY INFORMATION:

Title: FERC-732, Electric Rate Schedules and Tariffs: Long-Term Firm Transmission Rights in Organized Electricity Markets.

OMB Control No.: 1902-0245.

Type of Request: Three-year extension of the FERC-732 information collection requirements with no changes to the reporting requirements.

Abstract: 18 CFR Part 42 provides the reporting requirements of FERC-732 as they pertain to long-term transmission rights. To implement section 1233 of the Energy Policy Act of 2005 (EPA 2005),¹ the Commission requires each transmission organization that is a public utility with one or more organized electricity markets to make available long-term firm transmission

rights that satisfy each of the Commission's guidelines.

The FERC-732 regulations require that transmission organizations (that are public utilities with one or more organized electricity markets) choose one of two ways to file:

- File tariff sheets making long-term firm transmission rights available that are consistent with each of the guidelines established by FERC.
- File an explanation describing how their existing tariffs already provide long-term firm transmission rights that are consistent with the guidelines.

Additionally, the Commission requires each transmission organization to make its transmission planning and expansion procedures and plans available to the public.

FERC-732 enables the Commission to exercise its wholesale electric rate and electric power transmission oversight and enforcement responsibilities in accordance with the FPA, the Department of Energy Organization Act (DOE Act), and EPA 2005.

The Commission intends to include the FERC-732 and all of its applicable requirements within FERC-516 (OMB Control No. 1902-0096). The Commission will ensure complete renewal (to include publishing all public notifications and receiving Office of Management and Budget approval) of FERC-732 information collection. After the collection is renewed, the Commission will seek to incorporate administratively FERC-732 information collection requirements into FERC-516. Finally, the Commission will discontinue the vacant FERC-732 information collection.

Type of Respondents: Public utility with one or more organized electricity markets.

Estimate of Annual Burden:² The Commission estimates the total Public Reporting Burden for this information collection as:

² Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, reference 5 Code of Federal Regulations 1320.3.

¹ Public Law 109-58.

FERC-732 (IC12-19-000): ELECTRIC RATE SCHEDULES AND TARIFFS: LONG-TERM FIRM TRANSMISSION RIGHTS IN ORGANIZED ELECTRICITY MARKETS

	Number of respondents	Number of responses per respondent	Total number of responses	Average burden hours per response	Estimated total annual burden
	(A)	(B)	(A) × (B) = C	(D)	(C) × (D)
Public utility with 1 or more organized electricity markets ..	1	1	1	1,180	1,180

The total estimated annual cost burden to respondents is \$81,431.68 [1,180 hours ÷ 2080 hours per year = 0.56731 * \$143,540/years = \$81,431.68].

Comments: Comments are invited on:

- (1) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility;
- (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used;
- (3) ways to enhance the quality, utility and clarity of the information collection; and
- (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: November 28, 2012.

Kimberly D. Bose,
Secretary.
