

and tests and maintain records (§ 112.7(e)).

**Plan Certification.** Under section 112.3(d), a SPCC Plan must, except as provided by 40 CFR Part 112.6 Qualified Facilities Plan Requirements, be reviewed and certified by a licensed Professional Engineer (PE) for it to be effective to satisfy the requirements. Under section 112.6, the owner or operator of a qualified facility may self certify the Plan if the facility meets the eligibility criteria in section 112.3(g).

**SPCC Plan Maintenance.** Under section 112.5, the owner or operator must complete a review and evaluation of the SPCC Plan at least once every five years from the date the facility becomes subject to part 112, or if the facility was in operation on or before August 16, 2002, five years from the date the last review. As a result of this review and evaluation, the owner or operator must amend the Plan within six months of the review to include more effective prevention and control technology if the technology has been field-proven at the time of the review and will significantly reduce the likelihood of a discharge of oil.

**Recordkeeping.** Under section 112.7(e), an owner or operator must conduct inspections, tests, and maintain records. The inspections and tests must be conducted in accordance with written procedures the facility or the certifying engineer developed for the facility. The written procedures and a record of the inspections and tests must be signed by the appropriate supervisor or inspector and kept with the SPCC Plan for a period of three years. Records of inspections and tests may be kept under usual and customary business practices.

**Number of Regulated Facilities.** At the time OMB approved the current ICR (June 15, 2010), EPA estimated that there were approximately 640,000 SPCC regulated facilities in 2010. The largest sectors in 2010 were oil and gas production with 215,000 affected facilities and farms with 149,000 affected facilities. As part of the regulatory impact analysis for the 2008 and 2009 SPCC amendments, EPA analyzed the growth rates for each industrial sector covered by the regulations. For this ICR, EPA applied those growth rates for the next ICR period. For some sectors, the growth rate for the number of facilities was negative: for example, the farm sector experienced a reduction in affected facilities. For other sectors such as oil and gas production sector, the growth rate for the number of affected facilities increased. For the growth rates for all sectors, EPA estimates there would be

approximately 657,000 SPCC regulated facilities in 2014 up from 640,000 in 2010; approximately 670,000 SPCC regulated facilities in 2015; and approximately 683,000 facilities in 2016.

**Burden Statement:** The average annual reporting and recordkeeping burden for this collection of information on a newly regulated facility for which a SPCC Plan is required (i.e., first-year costs for plan development) is estimated to be approximately 58 hours per year. The average annual reporting and recordkeeping burden on a regulated facility for which the owner or operator is maintaining an SPCC Plan is estimated at approximately 11 hours per year. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR supporting statement provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

*Estimated total number of potential respondents:* 663,000.

*Frequency of response:* Less than once per year.

*Estimated total annual burden hours:* 8,700,000 hours.

*Estimated total annual costs:* \$987,000,000, which includes \$183,000,000 annualized capital and operation and maintenance (O&M) costs.

#### **Are there changes in the estimates from the last approval?**

EPA estimates no substantive change in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This conclusion is based on EPA's current estimate of facilities that have written and are maintaining an SPCC Plan in compliance with 40 CFR Part 112. EPA amended the SPCC regulation to exempt milk and milk product containers since the last ICR renewal that results in a small reduction in the

number regulated facilities and savings in terms of total labor hours and total cost burden. The agency also extended the compliance date for farms, but that regulatory action does not affect the number of facilities, labor hours and cost burden.

#### **What is the next step in the process for this ICR?**

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
