j. *Cooperating agencies*: Federal, state, local, and tribal agencies with jurisdiction and/or special expertise with respect to environmental issues that wish to cooperate in the preparation of the environmental document should follow the instructions for filing such requests described in item k below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of the environmental document cannot also intervene. *See*, 94 FERC ¶ 61,076 (2001).

k. *Deadline for filing motions to intervene and protests, comments, terms and conditions, recommendations, prescriptions, and requests for cooperating agency status*: Due to the previous opportunities to file motions to intervene and protests, comments, terms and conditions, recommendations, and prescriptions under P–12970–001, the 60-day timeframe specified in 18 CFR 4.34(b) for filing comments (including mandatory and recommended terms and conditions or prescriptions) on the application for license is shortened. Motions to intervene and protests, comments, terms and conditions, recommendations, prescriptions, and requests for cooperating agency status on the license application are due 30 days from the issuance date of this notice. All reply comments must be filed with the Commission within 45 days from the date of this notice. Comments, interventions, and protests filed on the exemption from licensing proceeding (P–12790–001) do not need to be refiled under P–12970–002. However, conditions filed under section 30(c) of the FPA will be considered under section 10(a) of the FPA unless they are withdrawn or superseded by conditions appropriate for an application for license.

All new documents may be filed electronically via the Internet. *See* 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site <http://www.ferc.gov/docs-filing/efiling.asp>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/>

[ecomment.asp](http://www.ferc.gov/docs-filing/ecomment.asp). You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at FERCOnlineSupport@ferc.gov or toll free at 1–866–208–3676, or for TTY, (202) 502–8659. Although the Commission strongly encourages electronic filing, documents may also be paper-filed. To paper-file, mail an original and five copies to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The Commission's Rules of Practice require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

l. The application for license has been accepted for filing and is now ready for environmental analysis.

m. *The Pomperaug Hydro Project would consist of*: (1) The existing 90-foot-long, 15-foot-high Pomperaug River dam equipped with three existing gates; (2) an existing 3-acre impoundment with a normal water surface elevation of 226.43 feet above mean sea level; (3) an existing 40-foot-long, 42- to 50-inch-diameter penstock; and (4) an existing powerhouse integral to the dam, containing one new 76-kilowatt turbine generating unit. Project power would be transmitted through a new 35-foot-long, 208-volt underground transmission line. The proposed project is estimated to generate an average of 300,000 kilowatt-hours annually.

The applicant proposes to: (1) Rehabilitate the existing gates and construct a new intake structure; (2) install the new turbine generating unit; (3) construct new fish and eel passage facilities; and (4) bury the new transmission line. The application for license does not include any proposed modifications to the crest elevation of the dam or the water surface elevation of the impoundment.

n. Due to the applicant's close coordination with federal and state agencies during the preparation of the application, completed studies, and prior opportunities for public and agency comment, we intend to waive scoping. The issues that need to be addressed in Commission staff's environmental assessment (EA) have been adequately identified through comments filed on P–12970–001 and comments made during a January 18,

2012, public meeting and site visit and no new issues are likely to be identified through additional scoping. The EA will consider assessing the potential effects of project construction and operation on geology and soils, aquatic resources, terrestrial resources, recreation, land use, aesthetic resources, and cultural resources.

o. A copy of the application is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link.
