SUPPLEMENTARY INFORMATION:

A. Background

Section 104(B) of the Consumer
 Product Safety Improvement Act of
 2008 (CPSIA), requires the CPSC to
 promulgate consumer product safety
 standards for durable infant or toddler
 products. On June 21, 2010, in
 compliance with the CPSIA, the
 Commission published in the **Federal
 Register** a safety standard for infant
 walkers that incorporated by reference
 the voluntary standard for infant
 walkers issued by ASTM International,
 ASTM F977-07, with some

modifications to further reduce the risk
 of injury associated with infant walkers.
 The rule became effective on December
 21, 2010.

B. Estimated Burden

Sections 8.1 and 9.1 of the voluntary
 standard ASTM F977-07, which is now
 a mandatory standard, contain
 requirements for marking, labeling, and
 instructional literature that are
 disclosure requirements, thus falling
 within the definition of "collections of
 information." 5 CFR 1320.3(c). Section
 8.1 of ASTM F977-07 requires:

- The name and the place of business
 (city, state, and mailing address,
 including zip code) and/or telephone
 number of the manufacturer, importer
 distributor, or seller; and
- A code mark or other means that
 identifies the date (month and year, as
 a minimum) of manufacture.

Section 9.1 of ASTM F977-07
 requires infant walkers to be provided
 with easy to read instructions regarding
 assembly, maintenance, cleaning, and
 use.

There are 16 known firms supplying
 infant walkers to the U.S. market. All 16
 firms are assumed to already use labels
 on both their products and their
 packaging, but they might need to make
 some modifications to their existing
 labels. The estimated time required to
 make these modifications is about 1
 hour per model. Each of these firms
 supplies an average of four different
 models of infant walkers; therefore, the
 estimated burden hours associated with
 labels is 1 hour × 16 firms × 4 models
 per firm = 64 annual hours.

Section 9.1 of ASTM F977-07
 requires instructions to be supplied
 with the product. This is a practice that
 is usual and customary with infant
 walkers. These are products that
 generally require some installation and
 maintenance instructions, and any
 products sold without such information
 would not be able to successfully
 compete with products that provide this
 information. Therefore, because the
 CPSC is unaware of infant walkers that:
 (a) generally require some installation,
 but (b) lack any instructions to the user
 about such installation, there are no
 burden hours associated with the
 instruction requirement in section 9.1
 because any burden associated with
 supplying instructions with infant
 walkers would be "usual and
 customary" and not within the
 definition of "burden" under OMB's
 regulations.

CPSC staff estimates that hourly
 compensation for the time required to
 create and update labels is \$27.12 (U.S.
 Bureau of Labor Statistics, "Employer
