Proposed Project

National Intimate Partner and Sexual Violence Survey (OMB No. 0920-0822, exp. 11/30/2013)—Revision—National Center for Injury Prevention and Control (NCIPC), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The health burden of Intimate Partner Violence (IPV), Sexual Violence (SV) and stalking are substantial. To address this important public health problem, in 2010, CDC implemented the National Intimate Partner and Sexual Violence

Survey (NISVS) which produces national and state level estimates of Intimate Partner Violence (IPV), Sexual Violence (SV) and stalking on an annual basis.

The National Intimate Partner and Sexual Violence Survey (NISVS) is an ongoing, nationally representative survey that assesses experiences of intimate partner violence, sexual violence and stalking among adult women and men in the United States. It measures lifetime victimization for these types of violence as well as victimization in the 12 months prior to taking the survey.

CDC proposes an additional 3 years of data collection for this revision request, which is currently approved under OMB# 0920-0822—expiration date: 11/30/2013. The proposed revision to the National Intimate Partner and Sexual Violence Survey (NISVS) involves testing a newly revised data collection instrument during the calendar year of 2013. The changes to the instrument are

twofold: first, the current NISVS survey instrument has been shortened in efforts to decrease the burden on respondents and to develop a core instrument that will be administered on an annual basis. Second, topic specific modules contain questions to produce data that are needed on a regular basis but are not needed annually. The overarching purpose of the information collected has not changed.

A total of 44,896 eligible households will be screened annually; out of the households screened, approximately 35,696 will not consent or agree to participate and 9,200 will complete the survey each year. The survey will be conducted among English and/or Spanish speaking male and female adults (18 years and older) living in the United States.

There are no costs to respondents other than their time. The total estimated annual burden hours are 6,078.

Type of respondent	Form name	Number of responses	Number of responses per respondent	Average burden per response (in hours)
Households	Screened	44,896	1	3/60
	Surveyed	9,200	1	25/60

Proposed Project

Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery—NEW—Epidemiology and Analysis Program Office, Office of Surveillance and Laboratory Services, Centers for Disease Control and Prevention (CDC).

As part of a Federal Government-wide effort to streamline the process to seek feedback from the public on service delivery, the CDC has submitted a Generic Information Collection Request (Generic ICR): “Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery” to OMB for approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 et. seq.).

To request additional information, please contact Kimberly S. Lane, Centers for Disease Control and Prevention, 1600 Clifton Road, MS-D74, Atlanta, GA 30333 or send an email to omb@cdc.gov.

SUPPLEMENTARY INFORMATION:

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

Abstract: The information collection activity will garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the

Administration’s commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

Feedback collected under this generic clearance will provide useful information, but it will not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program
