SUPPLEMENTARY INFORMATION:

I. Abstract

Form BE-40, Institutional Remittances to Foreign Countries, obtains data from U.S. nonprofit organizations whose remittances were \$100,000 or more for the previous year or are expected to meet or exceed that amount during the current year. The data is collected quarterly from organizations remitting \$1 million or more each year and annually for organizations remitting at least \$100,000 but less than \$1 million each year. Potential respondents are U.S. religious, charitable, educational, scientific and

similar nonprofit organizations that voluntarily agree to provide data on their transfers to foreign residents and organizations and on their expenditures in foreign countries.

The data collected are cut-off sample data. The Bureau of Economic Analysis (BEA) estimates data for non-respondents.

The data are needed by BEA for compiling the U.S. international transactions accounts (ITAs), which BEA publishes quarterly. The ITAs are used extensively by both government and private organizations for national and international economic policy formulation and for analytical purposes. The information collected in this survey is used to develop the "private remittances" portion of the ITAs. Without this information, an integral component of the ITAs would be omitted. No other government agency collects comprehensive quarterly data on institutional remittances of funds to foreign countries. Quarterly reports are due 30 days after the close of each calendar or fiscal quarter and annual reports are due 90 days after the close of the calendar or fiscal year.

The survey form is reformatted to better facilitate survey responses. No changes are proposed for the data collected or for exemption levels.

II. Method of Collection

The surveys are sent to the respondents by U.S. mail; the surveys are also available from the BEA Web site. Respondents return the surveys one of four ways: U.S. mail, electronically using BEA's electronic collection system (eFile), fax, or email.

Legal Authority: Bretton Woods Agreement Act, Section 8, and E.O. 10033, as amended.

IV. Request for Comments

of the functions of the Agency, including whether the information will have practical utility; (b) the accuracy of the Agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Endangered and Threatened Species; Notice of Intent To Prepare a Recovery Plan for Oregon Coast Coho Salmon Evolutionarily Significant Unit

AGENCY: National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of intent to prepare a recovery plan; request for information.

SUMMARY: The National Marine Fisheries Service (NMFS) is announcing its intent to prepare a recovery plan for Oregon Coast coho salmon (*Oncorhynchus kisutch*) Evolutionarily Significant Unit (ESU) (OC coho) and requests information from the public. We are required by the Endangered Species Act of 1973 (ESA), as amended, to develop plans for the conservation and survival of federally listed species, i.e., recovery plans.

DATES: To allow adequate time to conduct a review of information submitted, all information must be received no later than July 25, 2013.

ADDRESSES: Information may be submitted by any of the following methods:

- *Via email:*

OCCohorecovery.nwr@noaa.gov (No files larger than 5MB can be accepted).

- *Via U.S. mail:* Rob Walton, National Marine Fisheries Service, 1201 NE Lloyd Blvd., Suite 1100, Portland, OR 97232 ATTN: OC Coho Recovery Coordinator.

- *Hand delivered:* National Marine Fisheries Service, National Marine Fisheries Service, 1201 NE Lloyd Blvd., Suite 1100, Portland, OR 97232 ATTN: OC coho Recovery Coordinator. Business hours are 8 a.m. to 4:30 p.m. Monday through Friday, except Federal holidays.

- *Via fax:* 503–230–5441. Please include the following on the cover page of the fax “ATTN: OC coho Recovery Coordinator.”

FOR FURTHER INFORMATION CONTACT: Rob Walton, OC coho Recovery Coordinator, (503) 231–2285

SUPPLEMENTARY INFORMATION: NMFS is charged with the recovery of OC coho, a species listed under the ESA. Recovery means that listed species and their ecosystems are restored, and their future secured, so that the protections of the ESA are no longer necessary. The ESA specifies that recovery plans must include: (1) A description of management actions necessary to achieve the plan's goals for the conservation and survival of the species; (2) objective, measurable criteria which, when met, would result in the species being removed from the list; and (3) estimates of the time and costs required to achieve the plan's goal and the intermediate steps towards that goal. Section 4(f) of the ESA, as amended in 1988, requires that public notice and an opportunity for public review and comment be provided during recovery plan development. We are soliciting relevant information related to OC coho and their freshwater/marine habitats, including:

1. Criteria for removing OC coho from the list of threatened and endangered species;

2. Human activities that contribute to the ESA listing factors (section 4(a)(1)(A)–(E));

- (A) the present or threatened destruction, modification, or curtailment of its habitat or range;

- (B) overutilization for commercial, recreational, scientific, or educational purposes;

- (C) disease or predation;

- (D) the inadequacy of existing regulatory mechanisms;

- (E) other natural or manmade factors affecting its continued existence.

3. Physical, biological or chemical features of the environment that limit the recovery of OC coho;

4. Strategies and/or actions necessary to recover OC coho;

5. Estimates of time and cost to implement recovery actions;

6. Critical knowledge gaps and/or uncertainties that need to be resolved to better inform recovery efforts; and

7. Research, monitoring and evaluation needs to address knowledge gaps and uncertainties, to assess the species' status, or to evaluate progress in addressing the ESA listing factors relative to recovery goals.

Upon completion, the proposed Recovery Plan will be available for public review and comment through the publication of a **Federal Register** Notice.

Preliminary Table of Contents

We have developed a draft table of contents for the proposed Recovery Plan for OC coho which can be accessed at http://www.nwr.noaa.gov/protected_species/salmon_steelhead/recovery_planning_and_implementation/oregon_coast/oregon_coast_salmon_recovery_domain.html.
