

EPA's regulations in title 40 of the Code of Federal Regulations (CFR), after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This ICR potentially affects non-federal Certified Applicators in three States (New Mexico, South Dakota, and Wyoming), the State lead agencies for pesticide regulation in those States that monitor the program and are themselves registrants of 1080 Livestock Protection Collar products, and one additional registrant. EPA also receives annual reports on use of a 1080 Livestock Protection Collar product registered to the U.S. Department of Agriculture, Animal and Plant Health Inspection Service (USDA/APHIS). That product is applied in several States by employees of USDA/APHIS. Applicators who are certified to apply livestock protection collars are required to keep records of: (a) The number of collars attached on livestock; (b) the pastures where collared livestock were placed; (c) the dates of each attachment, inspection, and removal; (d) the number and locations of livestock found with ruptured or punctured collars and the apparent cause of the damage; (e) the number, dates, and approximate location of all collars lost; and (f) the species, locations, and dates of all suspected poisonings of humans, domestic animals or non-target wild animals resulting from collar use.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 40 hours per response. Burden is defined in 5 CFR 1320.3(b).

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

Respondents/Affected Entities: Entities potentially affected by this ICR are pesticide and other agricultural manufacturers (NAICS 325320), e.g., pesticide registrants whose products include 1080 collars; and government establishments primarily engaged in administration of environmental quality programs (NAICS 9241) e.g., States implementing a 1080 collar monitoring program.

Estimated total number of potential respondents: 48.

Frequency of response: Annual.

Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 1,944 hours.

Estimated total annual costs: \$83,335. This includes an estimated burden cost of \$83,335 and an estimated cost of \$0 for capital investment or maintenance and operational costs.

III. Are there changes in the estimates from the last approval?

There is no change of 1,944 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB.

IV. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Underground Injection Control Program; Hazardous Waste Injection Restrictions; Petition for Exemption—Class I Hazardous Waste Injection; Blanchard Refining Company LLC Galveston Bay Refinery, Texas City, Texas (Formerly BP Products North America Inc.—Texas City Business Unit)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of a final decision on a no migration petition reissuance.

SUMMARY: Notice is hereby given that a reissuance of an exemption to the land disposal Restrictions, under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act, has been granted to Blanchard Refining Company LLC (Blanchard) Galveston Bay Refinery for three existing Class I injection wells located at Texas City, Texas. The company has adequately demonstrated to the satisfaction of the Environmental Protection Agency by the petition reissuance application and supporting documentation that, to a reasonable degree of certainty, there will be no migration of hazardous constituents from the injection zone for as long as the waste remains hazardous. This final decision allows the continued underground injection by Blanchard of the specific restricted hazardous wastes identified in this exemption into Class I hazardous waste injection wells Nos. WDW-80, 127, and 128 at the Galveston Bay Refinery facility, until December 31, 2020, unless EPA moves to terminate this exemption. Additional conditions included in this final decision may be reviewed by contacting the Region 6 Ground Water/UIC Section. A public comment period for the proposed approval of this reissuance was May 7, 2013, through June 24, 2013, and no comments were received. This decision constitutes final Agency action and there is no Administrative appeal. This decision may be reviewed/appealed in compliance with the Administrative Procedure Act.

DATES: This action is effective as of July 2, 2013.

ADDRESSES: Copies of the petition reissuance and all pertinent information relating thereto are on file at the following location: Environmental Protection Agency, Region 6, Source Water Protection Branch (6WQ-S), 1445 Ross Avenue, Dallas, Texas 75202-2733.

FOR FURTHER INFORMATION CONTACT: Philip Dellinger, Chief Ground Water/UIC Section, EPA—Region 6, telephone (214) 665-7150.

Dated: July 2, 2013.
