SUPPLEMENTARY INFORMATION: The changes to this final SRP Chapter reflect the current NRC staff review methods and practices based on lessons learned from NRC reviews of design certification (DC) and combined license (COL) applications completed since the last revision of this chapter in March 2007. Changes include: (1) Adding guidance to the staff for evaluating the acceptability of the radiation protection program, including the applicant's use of generic radiation protection and groundwater program templates, (2) providing additional guidance for review of existing regulatory requirements related to the material covered in Chapter 12 of the SRP, (3) updating the review interfaces to improve the efficiency and consistency of staff reviews, and (4) updating references covered in SRP Chapter 12.

On November 6, 2012 (77 FR 66650), the NRC published for public comment the proposed revisions to four sections in Chapter 12, "Radiation Protection." Comments were received on the proposed revision. The staff made changes to the proposed revision after consideration of the comments. A summary of the comments and the staff's disposition of the comments are available in a separate document, *Response to Public Comments on Draft Standard Review Plan (SRP) Chapter 12,*

"Radiation Protection" (ADAMS Accession No. ML13150A042).

Additionally, the NRC staff will incorporate the positions reflected in these revisions of SRP Sections in Chapter 12 into the next revision of Regulatory Guide 1.206, "Combined License Applications for Nuclear Power Plants" (ADAMS Accession No. ML070720184).

Backfitting and Issue Finality

Issuance of this final SRP section does not constitute backfitting as defined in § 50.109 of Title 10 of the *Code of Federal Regulations* (10 CFR) (the Backfit Rule) and is not otherwise inconsistent with the issue finality provisions in 10 CFR part 52. The staff's position is based upon the following considerations:

1. *The SRP positions do not constitute backfitting, inasmuch as the SRP is internal guidance directed at the NRC staff with respect to their regulatory responsibilities*

The SRP provides guidance to the staff on how to review an application for NRC regulatory approval in the form of licensing. Changes in internal staff guidance are not matters for which either nuclear power reactor license applicants or holders are protected under either the Backfit Rule or the issue finality provisions of 10 CFR part 52.

2. *The NRC staff has no intention to impose the SRP positions on current licensees and regulatory approvals either now or in the future*

The staff does not intend to impose or apply the positions described in the SRP to existing (already issued) licenses and regulatory approvals. Hence, the issuance of a final SRP—even if considered guidance within the purview of the issue finality provisions in 10 CFR part 52—need not be evaluated as if it were a backfit or as being inconsistent with issue finality provisions. If, in the future, the staff seeks to impose a position in the SRP on holders of already issued licenses in a manner which does not provide issue finality as described in the applicable issue finality provision, then the staff must make the showing as set forth in the Backfit Rule or address the criteria for avoiding issue finality as described in the applicable issue finality provision.

3. *Backfitting and issue finality do not—with limited exceptions not applicable here—protect current or future applicants*

Applicants and potential applicants are not, with certain exceptions, protected by either the Backfit Rule or

any issue finality provisions under 10 CFR part 52. This is because neither the Backfit Rule nor the issue finality provisions under 10 CFR part 52—with certain exclusions discussed below—were intended to apply to every NRC action which substantially changes the expectations of current and future applicants.

The exceptions to the general principle are applicable whenever an applicant references a 10 CFR part 52 license (e.g., an early site permit) and/or NRC regulatory approval (e.g., a design certification rule) with specified issue finality provisions. The staff does not, at this time, intend to impose the positions represented in the SRP in a manner that is inconsistent with any issue finality provisions. If, in the future, the staff seeks to impose a position in the SRP in a manner which does not provide issue finality as described in the applicable issue finality provision, then the staff must address the criteria for avoiding issue finality as described in the applicable issue finality provision.

SUPPLEMENTARY INFORMATION: The Occupational Questionnaire is an optical scan form designed to collect applicant information and qualifications in a format suitable for automated processing and to create applicant

records for an automated examining system. The 1203 series was commonly referred to as the “Qualifications and Availability Form C.” OPM has re-titled the series as “Occupational Questionnaire” to fit a more generic need. OPM uses this form to carry out its responsibility for open competitive examining for admission to the competitive service in accordance with section 3304, of title 5, United States Code. One change has been made to the form under *Section 14, Veterans' Preference*. The addition of *Sole Survivorship Preference* was added to reflect the amended eligibility categories for veterans' preference per Public Law 110–317, the Hubbard Act. Subparagraph (H) established the new category for veterans released or discharged from a period of active duty from the armed forces, after August 29, 2008, by reason of a “sole survivorship discharge.”
