Federal Energy Regulatory Commission

[Docket No. CP13–498–000]

Eastern Shore Natural Gas Company; Notice of Availability of the Environmental Assessment for the Proposed White Oak Lateral Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the White Oak Lateral Project (Project), proposed by Eastern Shore Natural Gas Company (Eastern Shore) in the above-referenced docket. Eastern Shore states that the Project would provide about 55,200 dekatherms of natural gas per day to Calpine Energy Services, L.P. to fuel the Garrison Energy Center, a 309-megawatt combined cycle natural gas fueled power plant under development in Kent County, Delaware.

The EA assesses the potential environmental effects of the construction and operation of the White Oak Lateral Project in accordance with the requirements of the National Environmental Policy Act. The FERC staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The proposed White Oak Lateral Project includes the following facilities, all in Kent County, Delaware:

- Approximately 5.5 miles of 16-inch-diameter natural gas pipeline;
- one mainline valve assembly; and
- one metering and regulating facility.

The FERC staff mailed copies of the EA to federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American tribes; potentially affected landowners and other interested individuals and groups; newspapers and libraries in the project area; and parties to this proceeding. In addition, the EA is available for public viewing on the FERC's Web site (www.ferc.gov) using the eLibrary link. A limited number of copies of the EA are available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference Room,
