

otherwise specified by the APHIS Administrator. Traditionally, burial has involved placement of carcasses in unlined pits or trenches, and burning has involved open pyres (i.e., combustible heaps). APHIS may work in conjunction with States to manage animal carcasses during or after an animal health emergency. However, State regulations concerning carcass management vary, and Federal and State regulations are not always based on the most current scientific information with regard to impacts of such activities on the environment and public health.

### Environmental Impact Statement

To examine the potential environmental effects of animal carcass management options used throughout the United States, APHIS is preparing an environmental impact statement (EIS). The EIS will analyze and compare all major and readily available mass carcass management options that may be utilized during an animal health emergency. APHIS is considering classifying mass carcass management as management of 50 tons or more of biomass per premises. In the EIS, we intend to compare unlined burial and open-air burning disposal methods with other available carcass management options. These may include composting (on- or off-site), rendering, landfills compliant with the Resource Conservation and Recovery Act (RCRA), and other fixed facility options, such as incinerators compliant with the Clean Air Act, that could accommodate a large volume of carcasses over a short period of time.

The findings of the EIS will be used for planning and decisionmaking and to inform the public about the potential environmental effects of currently available carcass management options. Additionally, when mass carcass management options are utilized, site-specific environmental documents may be required. If such documents are needed, APHIS may use information presented and analyzed in the EIS, which will help APHIS to promptly fulfill its environmental compliance obligations when an emergency situation arises requiring immediate action.

We are requesting public comment to help us identify or confirm potential alternatives and environmental effects, as well as any other issues, that could and should be examined in the EIS. The EIS will be prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the

procedural provisions of NEPA (40 CFR parts 1500–1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

### Alternatives

We have identified the following alternatives for further examination in the EIS:

*Take no action.* Under the no action alternative, existing APHIS regulations that recommend unlined burial and open-air burning will be used as the baseline against which alternative carcass management methods may be compared. This action does not involve changes to the current situation.

*Alternative action.* Under the alternative action, APHIS is considering alternatives in addition to unlined burial and open-air burning as carcass management options. Alternative actions may include one or some combination of the following: Composting (on- or off-site), rendering, RCRA-compliant landfills, and other fixed facility options, such as incinerators compliant with the Clean Air Act.

### Environmental Effects for Consideration

We have identified the following potential environmental effects for examination in the EIS. We are requesting that the public comment on them during the scoping period:

- Effects on soil, air, and water quality.
- Effects on humans:
- Health and safety.
- Agricultural lands.
- Industries and the economy.
- Public perception.
- Cultural and historic resources.
- Effects on wildlife populations, including effects on federally listed threatened and endangered species.
- Effects on plant populations, including effects on federally listed threatened and endangered species.

Comments that identify other issues or alternatives that could be considered for examination in the EIS would be especially helpful. All comments received during the scoping period will be carefully considered in developing the final scope of the EIS. Upon completion of the draft EIS, a notice announcing its availability and an opportunity to comment on it will be published in the **Federal Register**.

**Authority:** 7 U.S.C. 8301–8317; 7 CFR 2.22, 2.80, and 371.4.

Done in Washington, DC, this 21st day of October 2013.

## DEPARTMENT OF AGRICULTURE

### National Agricultural Statistics Service

### Notice of Intent To Request Revision and Extension of a Currently Approved Information Collection

**AGENCY:** National Agricultural Statistics Service, USDA.

**ACTION:** Notice and request for comments.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995, this notice announces the intention of the National Agricultural Statistics Service (NASS) to request revision and extension of a currently approved information collection, the Agricultural Surveys Program. Revision to burden hours will be needed due to changes in the size of the target population, sampling design, and/or questionnaire length.

**DATES:** Comments on this notice must be received by December 24, 2013 to be assured of consideration.

**ADDRESSES:** You may submit comments, identified by docket number 0535–0213, by any of the following methods:

- *Email:* [ombofficer@nass.usda.gov](mailto:ombofficer@nass.usda.gov).

Include docket number above in the subject line of the message.

- *Fax:* (202) 720–6396.

- *Mail:* Mail any paper, disk, or CD–ROM submissions to: David Hancock, NASS Clearance Officer, U.S.

Department of Agriculture, Room 5336 South Building, 1400 Independence Avenue SW., Washington, DC 20250–2024.

- *Hand Delivery/Courier:* Hand deliver to: David Hancock, NASS Clearance Officer, U.S. Department of Agriculture, Room 5336 South Building, 1400 Independence Avenue SW., Washington, DC 20250–2024.

### FOR FURTHER INFORMATION CONTACT:

Joseph T. Reilly, Associate Administrator, National Agricultural Statistics Service, U.S. Department of Agriculture, (202) 720–4333. Copies of this information collection and related instructions can be obtained without charge from David Hancock, NASS Clearance Officer, at (202) 690–2388.

### SUPPLEMENTARY INFORMATION:

*Title:* Agricultural Surveys Program.  
*OMB Control Number:* 0535–0213.

*Expiration Date of Approval:* March 31, 2014.

*Type of Request:* To revise and extend a currently approved information collection for a period of three years.

*Abstract:* The primary objective of the National Agricultural Statistics Service (NASS) is to collect, prepare and issue State and national estimates of crop and livestock production, prices and disposition as well as economic statistics, farm numbers, land values, on-farm pesticide usage, pest crop management practices, as well as the Census of Agriculture. The Agricultural Surveys Program contains a series of surveys that obtains basic agricultural data from farmers, ranchers, and feedlots throughout the Nation for preparing agricultural estimates and forecasts of crop acreage, yield, and production; stocks of grains and soybeans; hog and pig numbers; sheep inventory and lamb crop; cattle inventory; cattle on feed; grazing fees; and land values. Uses of the statistical information collected by these surveys are extensive and varied. Producers, farm organizations, agribusinesses, commodity exchanges, State and national farm policy makers, and government agencies are important users of these statistics. Agricultural statistics are used to plan and administer other related Federal and State programs in such areas as consumer protection, conservation, foreign trade, education, and recreation.

**Authority:** These data will be collected under the authority of 7 U.S.C. 2204(a). Individually identifiable data collected under this authority are governed by Section 1770 of the Food Security Act of 1985 as amended, 7 U.S.C. 2276, which requires USDA to afford strict confidentiality to non-aggregated data provided by respondents. This Notice is submitted in accordance with the Paperwork Reduction Act of 1995, Pub. L. 104–13 (44 U.S.C. 3501, et seq.) and Office of Management and Budget regulations at 5 CFR part 1320.

NASS also complies with OMB Implementation Guidance, “Implementation Guidance for Title V of the E-Government Act, Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA),” *Federal Register*, Vol. 72, No. 115, June 15, 2007, p. 33362.

*Estimate of Burden:* Public reporting burden for this collection of information will range from 5 to 20 minutes per response.

*Respondents:* Farmers, Ranchers and Feed Lots.

*Estimated Number of Respondents:* 530,000.

*Estimated Total Annual Burden on Respondents:* 200,000 hours.

*Comments:* Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency’s estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, through the use of appropriate automated, electronic, mechanical, technological or other forms of information technology collection methods.

All responses to this notice will become a matter of public record and be summarized in the request for OMB approval.

Signed at Washington, DC, September 26, 2013.

**Joseph T. Reilly,**

*Associate Administrator.*

#### SUPPLEMENTARY INFORMATION:

*Title:* Aquaculture Surveys.

*OMB Control Number:* 0535–0150.

*Expiration Date:* March 31, 2014.

*Type of Request:* To revise and extend a currently approved information collection for a period of three years.

*Abstract:* The primary objective of the National Agricultural Statistics Service is to prepare and issue State and national estimates of crop and livestock production, prices, and disposition. The Aquaculture Surveys collect information on both trout and catfish. The trout surveys include: inventory counts, sales (dollars, pounds and quantity), percent of product sold by outlet at the point of first sale, number of fish raised for release into open waters, and losses. The catfish surveys include: inventory counts, water surface acreage used for production, sales (dollars, pounds, and quantity), number of catfish processed, and amount of catfish feed delivered to catfish producers. Survey results are used by government agencies in planning farm programs.

- Twenty-five States are in the Trout Production Survey. In January, data are collected in the selected states that produce and either sell or distribute trout. State, federal, tribal, and other facilities where trout are raised for conservation, restoration, or recreational purposes are included in the survey.

- Nine States are in the Catfish Production Survey. Data are collected from farmers in January for inventory, water surface acreage, and previous year sales. In addition, farmers in the three major catfish producing States are surveyed in July for mid-year inventory and water surface acreage.

- All catfish processing plants, with the capacity to process 2,000 pounds of live weight per 8 hour shift are in the Catfish Processing Survey. Plants are surveyed monthly for amount purchased, prices paid, amount sold,
