

Respondents/affected entities: Owners or operators of phosphate rock plants.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart NN).

Estimated number of respondents: 14 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 1,724 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$301,256 (per year), which includes \$132,582 annualized capital and/or operation & maintenance costs.

Changes in the Estimates: The increase in burden from the most recently approved ICR is due to an increase in the number of new or modified sources and an increase in labor costs. This ICR uses updated labor rates from the Bureau of Labor Statistics to calculate burden costs.

Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 60, subpart A, and any changes, or additions to the Provisions, are specified at 40 CFR part 60, subpart Da. Owners or operators of the affected facilities must submit a onetime-only report of any physical or operational changes, initial performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is

inoperative. Reports are required semiannually at a minimum.

Form Numbers: None.

Respondents/affected entities:

Owners or operators of electric utility steam generating units.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart Da).

Estimated number of respondents: 710 (total).

Frequency of response: Initially, quarterly, and semiannually.

Total estimated burden: 168,258 hours (per year). "Burden" is defined at 5 CFR 1320.3(b).

Total estimated cost: \$29,143,496 (per year), includes \$12,685,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase of 7,419 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. There is also an increase in capital/startup and O&M costs as compared to the previous ICR. All changes from the most recently approved ICR are due to an increase in the number of existing sources subject to the standard, and are not due to any program changes. The number of existing sources has been increased to account for industry growth that has occurred since the most recent ICR was approved.

There is also an increase in respondent and Agency burden costs from the most-recently approved ICR due to the use of updated labor rates. This ICR references labor rates from the Bureau of Labor Statistics to calculate respondent burden costs, and references labor rates from OPM to calculate Agency burden costs.
