[Docket Nos. CP13-25-000 and Docket No. PF 12-13-000; Docket Nos. CP13-27-000 and Docket No. PF12-12-000]

Cameron LNG, LLC; Cameron Interstate Pipeline, LLC; Notice of Applications

Take notice that on December 7, 2012, Cameron LNG, LLC (Cameron LNG), 101 Ash Street, San Diego, California 92101, filed in Docket No. CP13-25-000 an application, pursuant to section 3 of the Natural Gas Act (NGA) and Part 153 of the Commission's regulations, for authorization to site, construct, and operate new liquefaction and export facilities in Cameron and Calcasieu Parishes, Louisiana (Liquefaction Project). Also take notice that on December 14, 2012, Cameron Interstate Pipeline, LLC (Cameron Interstate), 101 Ash Street, San Diego, California 92101, filed in Docket No. CP13-27-000 an application, pursuant to section 7(c) of the NGA and Parts 157 and 284 of the Commission's regulations, for authorization to construct and operate additional loop pipeline, compression and metering facilities in Beauregard, Calcasieu, and Cameron Parishes (Pipeline Project), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, Cameron LNG requests authorization to construct three liquefaction trains with a total production capacity of 12 million metric tonnes per annum (MPTA) of LNG, a fourth storage tank, electrical power generation and other facilities within the site of and adjacent to its existing LNG terminal. Cameron LNG anticipates placing the first train into service in July 2017 and the last in July 2018 for a total capability to export approximately 1.7 billion cubic feet per day (Bcfd) of domestic natural gas. Cameron Interstate requests authorization to construct 21 miles of 42-inch diameter pipeline looping its existing system, a new 56,820 horsepower compressor station in Calcasieu Parish, a new pipeline interconnection and modifications to four other interconnections as well as

metering facilities at the Cameron LNG terminal. The cost of the pipeline project is estimated to be approximately \$286.5 million. Upon completion, the proposed pipeline facilities will allow reversal of flow north to south on Cameron Interstate's system to provide up to 2.33 Bcfd of domestic natural gas supply to Cameron LNG's liquefaction facilities. Cameron Interstate proposes to charge incremental rates for the new north to south transportation service and requests waiver of the Commission's regulations to, among other things, update its pro forma rates as the time for commencement of service to reflect actual costs and to substitute such updated rates for those provided in the application. Cameron LNG and Cameron Interstate request issuance of an order by October 1, 2013 granting the authorizations requested.

Any questions regarding either Cameron LNG's application in Docket No. CP13-25-000 or Cameron Interstate's application in Docket No. CP13-27-000 should be directed to counsel representing both companies, William D. Rapp, 101 Ash Street, San Diego, California 92101, or phone (619)699-5050, or email wrapp@sempraglobal.com.

Pursuant to section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

On May 9, 2012, the Commission staff granted Cameron LNG's request to utilize the Pre-Filing Process and assigned Docket No. PF12-13 to staff activities involved with Cameron LNG's Liquefaction Project. Now, as of the filing of the application on December 7, 2012, the Pre-Filing Process for this project has ended. From this time forward, this proceeding will be conducted in Docket No. CP13-25-000, as noted in the caption of this Notice.
