SUPPLEMENTARY INFORMATION: The Service announces the availability of a revised recovery plan for the pallid sturgeon (*Scaphirhynchus albus*).

Background

Recovering an endangered or threatened animal or plant to the point where it is again a secure, sustainable member of its ecosystem is a primary goal of the Service's endangered species program. To help guide the recovery effort, the Service prepares recovery plans for the federally listed species native to the United States where a plan will promote the conservation of the species. Recovery plans describe site-specific actions necessary for the conservation of the species; establish objective, measurable criteria which, when met, would result in a determination that the species no longer needs the protection of the Act (16 U.S.C. 1531 et seq.); and provide estimates of the time and cost for
