

training; and requirements for inspections, annual reviews, and renewal. Fees for training providers were also modified so that the annual renewal would not lead to a fee increase over the EPA program.

During the public hearings before the Air Quality Council, concerns were raised that the DEQ RRP program would cause financial hardship on renovation firms and training providers that were already approved by EPA at the time of delegation approval and might have several years left before they were required to renew under the EPA program. In response, the proposed rules were amended to include transition language exempting EPA-approved firms and training providers from fees until the expiration of their EPA-approval.

The Oklahoma RRP program will utilize the existing accreditation structure of inspections and close review to ensure a quality training system. The existing DEQ enforcement system will also apply to the RRP program, but for the RRP firms and their work practices, much of the enforcement will come through the DEQ complaint system. The complaint system uses a toll-free state wide number, strict timelines for response and investigation, and referral to the various DEQ divisions for expert follow-up. The DEQ complaint system is well-established and has proven effective in all programs, including the Oklahoma LBP activities program. The activities program provides a network of individuals and firms throughout the state that also self-monitor to assist in compliance.

IV. Federal Overfiling

Section 404(b) of TSCA makes it unlawful for any person to violate, or fail or refuse to comply with, any requirement of an approved state program. Therefore, EPA reserves the right to exercise its enforcement authority under TSCA against a violation of, or a failure or refusal to comply with, any requirement of an authorized state program.

V. Withdrawal of Authorization

Pursuant to section 404(c) of TSCA, the EPA Administrator may withdraw authorization of a State or Indian tribal renovation, repair and painting program, and/or a lead-based paint pre-renovation education program, after notice and opportunity for corrective action, if the program is not being administered or enforced in compliance with standards, regulations, and other requirements established under the authorization. The procedures U.S. EPA

will follow for the withdrawal of an authorization are found at 40 CFR 745.324(I).
