

Commission receives a request for, or proposes to disclose such information, the respondent would be required to show, pursuant to Commission rules for withholding from public inspection information submitted to the Commission, that the information in question is entitled to confidential treatment. We will retain our current policies and procedures regarding the protection of submitted FCC Form 477 data subject to confidential treatment, including the use of only non-company specific aggregates of subscribership data in our published reports. Most of the broadband deployment data to be collected on Form 477 as a result of modifications will be made publicly available. NTIA currently publishes similar data on the National Broadband Map Web site at www.broadbandmap.gov. The Commission will coordinate with NTIA to continue the publication of the National Broadband Map using the data to be collected through modifications to Form 477. The one exception is that mobile broadband and voice providers can request confidential treatment of their deployment data by spectrum band.

Needs and Uses: On June 27, 2013, the Commission released a *Report and Order* ("Order"), FCC 13–87, in WC Docket No. 11–10 (attached). With this Order, the Commission revised the Form 477 data collection to improve its ability to measure and understand the extent of broadband deployment and local telephone competition. This Order made various changes and modification to the information collection requirements associated with Form 477.

FCC Form 477 gathers information on the development of local telephone competition, including telephone services and interconnected Voice over Internet Protocol (VoIP) services, and on the deployment of broadband Internet access services. FCC staff use the information to advise the Commission about the efficacy of its rules and policies adopted to implement the Telecommunications Act of 1996. The data are necessary to evaluate the status of local telecommunications competition and broadband deployment. The Commission uses the data to prepare reports that help inform consumers and policy makers on the deployment and adoption of broadband services and on developments related to competition in the local telephone service market. The Commission also uses the data to support its analyses in a variety of rulemaking proceedings under the Communications Act, including those related to fulfilling its universal service mandate.

Needs and Uses: On August 1, 2003, the Commission released the *Declaratory Ruling*, In the Matter of Telecommunication Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities, CC Docket No. 98–67, published at 68 FR 55898, September 28, 2003. In the *Declaratory Ruling*, the Commission clarified that one-line captioned telephone voice carry over (VCO) service is a type of telecommunications relay service (TRS) and that eligible providers of such services are eligible to recover their costs in accordance with section 225 of the Communications Act. The Commission also clarified that certain TRS mandatory minimum standards do not apply to one-line captioned telephone VCO service, and waived 47 CFR 64.604(a)(1) and (a)(3) of the Commission's rules for all current and future captioned telephone VCO service providers, for the same period of time beginning August 1, 2003. The waivers were contingent on the filing of annual reports, for a period of three years, with the Commission. Sections 64.604 (a)(1) and (a)(3) of the Commission's rules, which contained information collection requirements under the PRA became effective on March 26, 2004.

On July 19, 2005, the Commission released an *Order*, In the Matter of Telecommunication Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities, CC Docket No. 98–67 and CG Docket No. 03–123, published at 70 FR 54294, September 14, 2005, that clarified two-line captioned telephone VCO service, like one-line captioned telephone VCO service, is a type of TRS eligible for compensation from the Interstate TRS Fund. Also, the Commission clarified that certain TRS mandatory minimum standards do not apply to two-line captioned VCO service, and waived 47 CFR 64.604(a)(1) and (a)(3) of the Commission's rules, for providers who offers two-line captioned VCO service. This clarification increased the number of providers who will be providing one-line and two-line captioned telephone VCO services.

On January 11, 2007, the Commission released a *Declaratory Ruling*, In the Matter of Telecommunications Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities, CG Docket No. 03–123, published at 72 FR 6960, February

14, 2007, granting a request for clarification that Internet Protocol (IP) captioned telephone relay service (IP CTS) is a type of TRS eligible for compensation from the Interstate TRS Fund (Fund) when offered in compliance with the applicable TRS mandatory minimum standards.

On August 26, 2013, the Commission issued a *Report and Order*, In the Matter of Misuse of Internet Protocol (IP) Captioned Telephone Service; Telecommunications Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities, CG Docket Nos. 13–24 and 03–123, published at 78 FR 53684, August 30, 2013, to address on an ongoing basis a dramatic spike in IP CTS usage that, if left unaddressed, would constitute a serious threat to the Fund. The *Report and Order* regulates practices relating to the marketing of IP CTS, imposes certain requirements for the provision of this service, and mandates registration and certification of IP CTS users. The Commission published a notice in the **Federal Register** pursuant to 5 CFR 1320.8(d) on September 25, 2013 (78 FR 59025) seeking comments from the public on the information collection requirements contained in the supporting statement. Sorenson Communications, Inc. and its subsidiary CaptionCall, LLC (together, CaptionCall) filed comments on November 25, 2013 regarding the user registration and certification requirements adopted in the *Report and Order* as well as the certification, recordkeeping, and reporting requirements for hardship exemptions to the captions default-off requirement, also adopted in the *Report and Order*. CaptionCall did not comment on the collections adopted in the *Report and Order*. Subsequently, on December 6, 2013, the United States Court of Appeals for the District of Columbia Circuit stayed “the rule adopted by the Commission [in the *Report and Order*] prohibiting compensation to providers for minutes of use generated by equipment consumers received from providers for free or for less than \$75.” *Sorenson Communications, Inc. and CaptionCall, LLC v. FCC*, Order, D.C. Cir., No. 13–1246, December 6, 2013, at 1–2. (For convenience, the Commission refers to the requirement subject to the stay as “the \$75 equipment charge rule.”) Because the \$75 equipment charge rule is related to the registration and certification requirements adopted in the *Report and Order*, the Commission will defer addressing in the supporting statement CaptionCall's comments on the user registration and

certification requirements until after the court issues a decision resolving the \$75 equipment charge rule on the merits. At this time, the Commission seeks OMB approval of (1) the requirements regarding the labeling of equipment, software and mobile applications; (2) the certification, recordkeeping, and reporting requirements for hardship exemptions to the captions default-off requirement; and (3) an additional information reporting requirement for IP CTS applicants that seek Commission certification to provide IP CTS and for IP CTS providers to provide assurance that they will not request or collect payment from the TRS Fund for service to consumers who do not satisfy the Commission's IP CTS registration and certification requirements. The Commission does not seek OMB approval of the user registration and certification requirements adopted in the *Report and Order* at this time.
