

consideration of the application of the average-to-transaction method to all sales as an alternative to the average-to-average method. If the value of sales to purchasers, regions, and time periods that pass the Cohen's *d* test accounts for more than 33 percent and less than 66 percent of the value of total sales, then the results support consideration of the application of an average-to-transaction method to those sales identified as passing the Cohen's *d* test as an alternative to the average-to-average method, and application of the average-to-average method to those sales identified as not passing the Cohen's *d* test. If 33 percent or less of the value of total sales passes the Cohen's *d* test, then the results of the Cohen's *d* test do not support consideration of an alternative to the average-to-average method.

If both tests in the first stage (*i.e.*, the Cohen's *d* test and the ratio test) demonstrate the existence of a pattern of prices that differ significantly such that an alternative comparison method should be considered, then in the second stage of the differential pricing analysis, the Department examines whether using only the average-to-average method can appropriately account for such differences. In considering this question, the Department determines whether using an alternative comparison method yields a meaningful difference in the weighted-average dumping margin as compared to that resulting from the use of the average-to-average method only. If the difference between the two weighted-average dumping margins is meaningful, then this demonstrates that the average-to-average method cannot account for the observed price differences, and, therefore, an alternative comparison method would be appropriate. In determining whether a difference in the two weighted-average dumping margins is meaningful, the Department considers whether (1) the resulting weighted-average dumping margin moves across the *de minimis* threshold, or (2) there is a 25 percent or greater relative change in the weighted-average dumping margins between the average-to-average method and an appropriate alternative comparison method where both rates are not zero or *de minimis*.

The Department is interested in public comments on the differential pricing analysis described above for the purpose of determining whether to apply an alternative comparison method. To assist commenters, the Department has made available on its Web site, <http://www.trade.gov/enforcement/>, SAS programs which the

Department currently use to conduct its differential pricing analysis. Also available on the Web site is the definition of the regions from the U.S. Census Bureau.

Any questions concerning file formatting, document conversion, access on the Internet, or other electronic filing issues should be addressed to Moustapha Sylla, Enforcement and Compliance Webmaster at (202) 482-0866, email address: webmaster-support@ita.doc.gov.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request; Implantation and Recovery of Archival Tags for Highly Migratory Species

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before July 8, 2014.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at JJessup@doc.gov).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Craig Cockrell, (301) 427-8503, or craig.cockrell@noaa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a currently approved information collection. The National Oceanic and Atmospheric Administration (NOAA)

allows scientists to implant archival tags in, or affix archival tags to, selected Atlantic Highly Migratory Species (tunas, sharks, swordfish, and billfish). Archival tags collect location, temperature, and water depth data that is useful for scientists researching the movements and behavior of individual fish. It is often necessary to retrieve the tags in order to collect the data. Therefore, the National Marine Fisheries Service (NMFS) exempts persons catching tagged fish from certain otherwise applicable regulations at 50 CFR 635 (e.g., immediate release of the fish, minimum size, prohibited species, retention limits). These participants must notify NOAA, return the archival tag or make it available to NOAA personnel, and provide information about the location and method of capture if they harvest a fish that has an archival tag. The information obtained is used by NOAA for international and domestic fisheries policy and regulations.

Scientists not employed by NOAA must obtain NOAA authorization before affixing or implanting archival tags and submit subsequent reports about the tagging of fish. NOAA needs that information to evaluate the effectiveness of archival tag programs, to assess the likely impact of regulatory allowances for tag recovery, and to ensure that the research does not produce excessive mortality.

II. Method of Collection

Tags and associated information are either mailed to NOAA and/or information may be collected via telephone.

III. Data

OMB Control Number: 0648-0338.

Form Number: None.

Type of Review: Regular submission (extension of a current information collection).

Affected Public: Individuals or households, business or other for-profit organizations, and not-for-profit institutions.

Estimated Number of Respondents: 50.

Estimated Time per Response: 30 minutes for reporting an archival tag recovery; 40 minutes each for notification of planned archival tagging activity and three reports.

Estimated Total Annual Burden Hours: 63.

Estimated Total Annual Cost to Public: \$0 in recordkeeping/reporting costs.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: May 6, 2014.

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

BILLING CODE 1505-01-D

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XA713

Endangered Species; File No. 16436-01

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application for permit modification.

SUMMARY: Notice is hereby given that the New York State Department of Environmental Conservation, 21 South Putt Corners Road, New Paltz, NY 12561 [Kathryn Hattala: Responsible Party], has applied in due form for a permit modification to take Atlantic sturgeon (*Acipenser oxyrinchus oxyrinchus*) and shortnose sturgeon (*Acipenser brevirostrum*) for purposes of scientific research.

DATES: Written, telefaxed, or email comments must be received on or before June 9, 2014.

ADDRESSES: The application and related documents are available for review by selecting "Records Open for Public Comment" from the *Features* box on the Applications and Permits for Protected Species (APPS) home page, <https://apps.nmfs.noaa.gov>, and then selecting File No. 16436-01 from the list of available applications.

These documents are also available upon written request or by appointment in the following office:

- Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301)427-8401; fax (301)713-0376.

Written comments on either application should be submitted to the Chief, Permits and Conservation Division

- By email to NMFS.Pr1Comments@noaa.gov (include the File No. in the subject line of the email);
- By facsimile to (301)713-0376; or
- At the address listed above.

Those individuals requesting a public hearing should submit a written request to the Chief, Permits and Conservation Division at the address listed above. The request should set forth the specific reasons why a hearing on the application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Malcolm Mohead at (301)427-8401.

SUPPLEMENTARY INFORMATION: The subject permit modification is requested under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

Permit No. 16436 was issued April 6, 2012 (77 FR 21754) to capture Atlantic sturgeon life stages in the Hudson River estuary to assess juvenile abundance, characterize the adult spawning stock, and generate population estimates. Atlantic sturgeon are authorized to be

captured with gill nets, trammel nets, and trawls; measured, weighed, genetic tissue sampled, fin ray clipped for aging; PIT tagged and Floy tagged, internally and externally acoustic tagged; anesthetized with up to 150 ppm MS-222; and gastric lavaged. The Permit Holder now proposes to consolidate takes of shortnose sturgeon, currently authorized separately in Permit No. 16439 with the takes of Atlantic sturgeon authorized in Permit No. 16436. The shortnose sturgeon Permit No. 16439 would be terminated upon issuance of the modification to Permit No. 16436. The Permit Holder also requests increasing the numbers and procedures for taking both Atlantic and shortnose sturgeon to meet further objectives, including understanding the impacts of both species to the (1) construction of the Tappan Zee Bridge, (2) laying of high voltage cable in the Hudson River by the Champlain Hudson Power Express project, and (3) impacts of high loads of contaminants identified in the Hudson River. New methods introduced in the modification would include contaminant research, incorporating laparoscopic liver biopsy, and anesthetizing animals with 250 mg/l MS-222 and electro-narcosis. A total of three incidental mortalities of shortnose and Atlantic sturgeon are anticipated annually as a result of increased research activity. The modification would be valid through the expiration date of the original Permit No. 16436 on April 5, 2017.

Dated: May 5, 2014.

Tammy C. Adams,

Acting Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.
