Animal Plant and Health Inspection Service

Title: Export Certification, Accreditation of Non-Government Facilities.

OMB Control Number: 0579-0130.

Summary of Collection: The Department of Agriculture (USDA), Animal and Plant Health Inspection Service (APHIS) is responsible for preventing plant diseases or insect pests from entering the United States, as well as, the spread of pests not widely distributed in the United States, and eradicating those imported when eradication is feasible. The Plant Protection Act (7 U.S.C. 7701 et. seq.), authorizes the Department to carry out this mission. In addition to its mission, APHIS provides export certification services to ensure other countries that the plants and plant products they are receiving from the United States are free of plant diseases and insect pests.

Need and Use of the Information: The accreditation process requires the use of several information activities to ensure that nongovernment facilities applying for accreditation processes the necessary qualifications. APHIS will collect information for applications submitted by operator/owner of a non-government facility seeking accreditation to conduct laboratory testing or phytosanitary inspection. The application should contain the legal name and full address of the facility, the name, address, telephone and fax numbers of the facility's operator, a description of the facility, and a description of the specific laboratory testing or phytosanitary inspection services for which the facility is seeking accreditation. If these activities are not conducted properly, APHIS export certification program would be compromised, causing a disruption in plant and plant product exports that could prove financially damaging to U.S. exporters.

Description of Respondents: Business or other for profit; State, Local and Tribal Government.

Number of Respondents: 9.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 199.

Animal and Plant Health Inspection Service

Title: Importation of Fresh Baby Kiwi from Chili Under a Systems Approach.

OMB Control Number: 0579-0374.

Summary of Collection: Under the Plant Protection Act (7 U.S.C. 7701-7772), the Secretary of Agriculture is authorized to carry out operations or measures to detect, eradicate, suppress, control, prevent, or retard the spread of plant pests new to the United States or not known to be widely distributed throughout the United States. The regulations "Subpart-Fruit and Vegetables" (7 CFR 319.56-1 through 319.56-58), prohibit or restrict the importation of fruits and vegetables into the United States from certain parts of the world to prevent the introduction and dissemination of plant pests that are not widely distributed within the United States. The regulations allow fresh baby kiwi fruit from Chile to be imported into the continental United States subject to a system approach. The action is necessary in order to provide an alternative mitigation measure other than fumigation with methyl bromide.

Need and Use of the Information: The Animal and Plant Health Inspection Service will use the following activities to collect information: Phytosanitary Certificate, Production Site Registration, and Labeling of Field Cartons or Containers.

If the information is not collected, APHIS' ability to protect the United States from exotic insect pest would be severely compromised.

Rural Utilities Service

Title: Electric System Emergency Restoration Plan.

OMB Control Number: 0572–0140.

Summary of Collection: Electric power systems have been identified in Presidential Decision Directive 63, May 1998, as one of the critical infrastructures of the United States. The term “critical infrastructure” is defined in section 1016(e) of the USA Patriot Act of 2001 (42 U.S.C. 5195c(e)). To ensure that the electric infrastructure in rural America is adequately protected, Rural Utilities Service requires that all current electric borrowers enhance an existing Emergency Restoration Plan (ERP) or, if none exists, develop and maintain an ERP.

Need and Use of the Information: Rural Development Utilities Programs (RDUP) requires that all current electric borrowers conduct a Vulnerability and Risk Assessment (VRA) of its respective systems and utilize the results of this assessment to enhance an existing ERP or create an ERP if none exists. The ERP provides written procedures detailing response and restoration efforts in the event of a major system outage resulting from a natural or man made disaster. RDUP requires each electric borrower to provide annually a self-certification, in writing, that an ERP exists and that an initial VRA has been performed. If this information were not collected, vulnerabilities may exist in the electric system infrastructure. The result would be increased risk to public safety and may affect the Government loan security.

Description of Respondents: Not-for-profit institutions; Business or other for-profit.

Number of Respondents: 625.

Frequency of Responses: Reporting: Annually.

Total Burden Hours: 313.
