SUMMARY: The National Science Foundation (NSF) is required to publish a notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act at Title 45 Part 670 of the Code of Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to this permit application by June 18, 2014. This application may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, Room 755, Division of Polar Programs, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95–541), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas a requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

Application Details

1. Applicant

Dr. Rachael Morgan-Kiss, 32 Pearson Hall, 701E High St., Department of Microbiology, Miami University, Oxford, OH, 45056.

Permit Application: 2015–002

Activity for Which Permit Is Requested

Introduce non-indigenous species into Antarctica; The applicant proposes to bring 10g cell pellets of algae cultures (Chlamydomonas ICE sp. and Isochyrsis MDV sp.), originally collected from Antarctica, for use in experiments to link their understanding of physiological responses in this organism in a laboratory setting with in situ physiological responses and to determine whether each organism is more competitive under limited nutrients (ie., shallow water) or limited light (ie., deep water). The algal pellets will be used to grow algae cultures which will be transferred to dialysis tubing at the Lake Bonney field camp. The dialysis chambers will be suspended in the Lake Bonney water column. Once samples are collected they will be processed either on site at the Lake Bonney field camp or at Crary Lab at McMurdo Station, resulting in the death of all cells. The cells will be processed in a variety of ways for different analyses back in the U.S. Any remaining viable cultures will be autoclaved to ensure 100% mortality of unused cultures.

Location

Lake Bonney in McMurdo Dry Valleys ASMA 2, and Crary Laboratory at McMurdo Station.

Dates

November 14 to December 3, 2014.

Nadene G. Kennedy,

Polar Coordination Specialist, Division of Polar Programs.

NUCLEAR REGULATORY COMMISSION

[Docket No. NRC-2014-0025]

Agency Information Collection Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has recently submitted to OMB for review the following proposal for the collection of

information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on February 25, 2014.

- 1. Type of submission, new, revision, or extension: Extension.
- 2. The title of the information collection: DOE/NRC Form 742, "Material Balance Report," and DOE/NRC Form 742C, "Physical Inventory Listing," and NUREG/BR-0007, "Instructions for the Preparation and Distribution of Material Status Reports."
- 3. Current OMB approval number: DOE/NRC Form 742: 3150–0004. DOE/NRC Form 742C: 3150–0058.
- 4. The form number if applicable: DOE/NRC Forms 742 and 742C.
- 5. How often the collection is required: DOE/NRC Form 742 is submitted once a year within 30 days after the start of a physical inventory as part of the material accounting and control procedures. DOE/NRC Form 742C is submitted once a year when licensees complete their physical inventory as part of the material accounting and control procedures.
- 6. Who will be required or asked to report: DOE/NRC Form 742: Persons licensed to possess specified quantities of special nuclear material or source material. Any licensee, including nuclear reactor licensees, possessing, or who had possessed in the previous reporting period, at any one time and location, special nuclear material in a quantity totaling one gram or more shall complete DOE/NRC Form 742. In addition, each licensee, Federal or State, who is authorized to possess, at any one time or location, 1 kilogram of foreign obligated source material, is required to file with the NRC an annual statement of source material inventory which is foreign-obligated. DOE/NRC Form 742C: Persons licensed to possess specified quantities of special nuclear material or source material. Any licensee, including nuclear reactor licensees, possessing, or who had possessed in the previous reporting period, at any one time and location, special nuclear material in a quantity totaling one gram or more shall complete DOE/NRC Form 742C.
- 7. An estimate of the number of annual responses:

DOE/NRC Form 742: 360 responses. DOE/NRC Form 742C: 360 responses.

8. The estimated number of annual respondents:

DOE/NRC Form 742: 360 respondents. DOE/NRC Form 742C: 360 respondents.

9. An estimate of the total number of hours needed annually to complete the requirement or request:

DOE/NRC Form 742: 1,260 hours. DOE/NRC Form 742C: 1,440 hours.

10. Abstract: The NRC is required to collect nuclear material transaction information for domestic safeguards use and make it available to the International Atomic Energy Agency (IAEA). Licensees use DOE/NRC Form 742 to report the material balance within 30 days after the start of a physical inventory of nuclear materials actually present at licensee's facilities, including the quantities of foreign obligated source material. Licensees use DOE/NRC Form 742C to report the material status based on a physical inventory of nuclear materials actually present at licensee's facilities. These forms enable the NRC to collect, retrieve, analyze, and submit the data to IAEA to fulfill its reporting responsibilities.

This information collection request will also categorize these forms as common forms. Once the OMB approves the use of these common forms, all Federal agencies using the forms may request use of these common forms without additional 60- or 30-day notice and comment requirements. At that point, each agency will account for its number of respondents and the burden associated with the agency's use.

The public may examine and have copied for a fee publicly-available documents, including the final supporting statement, at the NRC's Public Document Room, Room O–1F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. The OMB clearance requests are available at the NRC's Web site: http://www.nrc.gov/public-involve/doc-comment/omb/. The document will be available on the NRC's home page site for 60 days after the signature date of this notice.

Comments and questions should be directed to the OMB reviewer listed below by June 18, 2014. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given to comments received after this date. Danielle Y. Jones, Desk Officer, Office of Information and Regulatory Affairs (3150–0004/3150–0058), NEOB–10202, Office of Management and Budget, Washington, DC 20503.

Comments can also be emailed to Danielle Y Jones@omb.eop.gov or submitted by telephone at 202–395–1741.

The Acting NRC Clearance Officer is Kristen Benney, telephone: 301–415–6355.

Dated at Rockville, Maryland, this 13th day of May 2014.

For the Nuclear Regulatory Commission.

Kristen Benney,

Acting NRC Clearance Officer, Office of Information Services.
