ICR Title: Asbestos-Containing Materials in Schools Rule and Revised Asbestos Model Accreditation Plan Rule.

ICR numbers: EPA ICR No. 1365.10, OMB Control No. 2070-0091.

ICR status: The current OMB approval for this ICR is scheduled to expire on May 31, 2014. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The Asbestos Hazard Emergency Response Act (AHERA) requires local education agencies (LEAs) to conduct inspections, develop management plans, and design or conduct response actions with respect to the presence of asbestos-containing materials in school buildings. AHERA also requires states to develop model accreditation plans for persons who perform asbestos inspections, develop management control plans, and design or conduct response actions. This information collection addresses the burden associated with recordkeeping requirements imposed on LEAs by the asbestos in schools rule, and reporting and recordkeeping requirements imposed on states and training

providers related to the model accreditation plan (MAP) rule.

EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA and 40 CFR part 2.

Form numbers: None.

Respondents/affected entities: Local education agencies (LEAs, e.g., elementary or secondary public school districts or a private school or school system); asbestos training providers to schools and educational systems; state education departments or commissions; or state public health departments or commissions.

Respondent's obligation to respond: Mandatory (see 40 CFR parts 763, Subpart E).

Estimated number of respondents: 133,507 (total).

Frequency of response: On occasion.

Total estimated burden: 2,487,439 hours per year. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$91,829,253 per year, includes \$0 annualized capital or operation and maintenance costs.

Changes in the estimates: There is a decrease of 105,449 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease reflects EPA's reduced estimate of the number of schools containing friable asbestos-containing materials.

Dated: May 16, 2014.

Erin Collard,

Acting Director, Collection Strategies Division.
