**SUPPLEMENTARY INFORMATION:** The Final FMP responds to, and incorporates agency and public comments received on the Draft EIS, which was available for public review from August 5, 2009, through October 6, 2009. Three public meetings were held on September 15th through 17th, 2009, and a total of 337 comments were received. The NPS responses to substantive agency and public comments are provided in Appendix 8 of the FEIS.

The FMP FEIS offers five management alternatives, including the no action alternative (Alternative 1) and four action alternatives. Alternatives 2 through 5 represent progressively increasing levels of change from current regulations and management approaches, and thus would result in differing future levels of fishery resources and gear-related habitat impacts in Biscayne National Park.

Alternative 1: The No-Action alternative serves as a basis of comparison with the other alternatives. Alternative 1 is characterized by the continuation of current fisheries management and no new regulatory changes would be triggered by the establishment of the FMP.

Alternative 2, Maintain at or Above Current Levels: Management actions would be enacted to maintain Biscayne National Park's fisheries resources at or above current existing levels. Actions would be implemented in conjunction with the FWC and could include moderate increases in minimum harvest sizes, moderate decreases in bag limits, and seasonal and/or spatial closures. Numbers of commercial fishers would remain at current levels or decrease over time. Additional Park-specific regulations and management actions could be enacted to maintain current levels only if levels of fish stocks or recreational fishing experience decline, or if fishing-related habitat impacts increase.

Alternative 3, Improve Over Current Levels: Management actions would be enacted in conjunction with the FWC to increase the abundance and average size of fishery-targeted species within the Park by at least 10 percent over existing conditions. A range of management actions to achieve the desired resource status would be considered, and include moderate increases in minimum harvest sizes, moderate decreases in bag limits,

seasonal and/or spatial closures. Under this alternative, the recreational Lobster Mini-Season would be eliminated in the Park and regulations would be enacted to prohibit the use of an air providing equipment (e.g. scuba or hookah) or use of gear with a trigger mechanism while spearfishing. Numbers of commercial fishers would remain at current levels or decrease over time. This alternative would require implementation of new regulations governing fishing activities within the Park that would be accomplished through continued collaboration with the FWC.

Promulgation of any new regulations would include additional opportunities for public comment.

Alternative 4, Rebuild and Conserve Park Fisheries Resources, (preferred alternative): Management strategies would seek a balance between enjoyment, extraction, and conservation of fishery resources, while ensuring sustainable fishing activities. Management actions would be enacted in conjunction with the FWC to increase the abundance and average size of fishery-targeted species within the Park by at least 20 percent over existing conditions, as well as to reduce fishing-related habitat impacts. Possible management actions to achieve substantial improvement of fisheries resources could include considerable increases in minimum size limits, designation of slot limits, substantial decreases in bag limits, and seasonal and/or spatial closures. Alternative 4 includes many of the same concepts previously described for Alternative 3. However numbers of commercial fishers would decrease over time via establishment of a non-transferable use-or-lose permit system, and a no-trawl zone within the Bay would be proposed for consideration by the FWC. This alternative would require considerable changes to current fishing regulations within the Park, and would be accomplished through continued collaboration with the FWC. Promulgation of any new regulations would include additional opportunities for public comment.

Alternative 5, Restore Park Fisheries Resources: This alternative would require the most change from current management strategies in order to return the sizes and abundance of targeted species within 20 percent of their estimated, historic levels and to prevent further decline in fishing-related habitat impacts. Possible management actions to achieve the desired conditions would be enacted in conjunction with the FWC and could include substantial increases in minimum size limits, designation of slot limits, substantial decreases in bag

limits, seasonal and/or spatial closures, prohibition of extractive fishing (i.e. only allowing catch-and-release fishing), and a temporary moratorium on all fishing activity within the Park. Among the five alternatives, this alternative would require the most extreme changes to current fishing regulations within the Park. These changes would be accomplished through continued collaboration with the FWC. Promulgation of any new regulations would include additional opportunities for public comment.

After careful consideration of public and agency comment, Alternative 4 continues to be the NPS preferred alternative because it results in the most equitable balance between protection and recreational enjoyment of the Park's fisheries resources. The NPS feels that Alternative 4 will allow for fishing activities to continue at a sustainable level that does not compromise the long-term health of the Park's fisheries resources.

The responsible official for this final FMP/EIS is the Regional Director for the Southeast Region, Stan Austin.

Dated: May 12, 2014.

**Sherri L. Fields,**

*Acting Regional Director, Southeast Region.*

### National Register of Historic Places; Notification of Pending Nominations and Related Actions

Nominations for the following properties being considered for listing or related actions in the National Register were received by the National Park Service before May 10, 2014. Pursuant to section 60.13 of 36 CFR part 60, written comments are being accepted concerning the significance of the nominated properties under the National Register criteria for evaluation. Comments may be forwarded by United States Postal Service, to the National Register of Historic Places, National Park Service, 1849 C St. NW., MS 2280, Washington, DC 20240; by all other carriers, National Register of Historic Places, National Park Service, 1201 Eye St. NW., 8th Floor, Washington, DC 20005; or by fax, 202-371-6447. Written or faxed comments should be submitted by June 13, 2014. Before including your address, phone number, email address,

or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: May 13, 2014.

**J. Paul Loether,**  
Chief, National Register of Historic Places/  
National Historic Landmarks Program.

## DEPARTMENT OF THE INTERIOR

### Bureau of Ocean Energy Management

[OMB Control Number 1010–0057;  
MMAA104000]

### Information Collection: Pollution Prevention and Control; Proposed Collection for OMB Review; Comment Request

**ACTION:** 60-Day notice.

**SUMMARY:** To comply with the Paperwork Reduction Act of 1995 (PRA), the Bureau of Ocean Energy Management (BOEM) is inviting comments on a collection of information that we will submit to the Office of Management and Budget (OMB) for review and approval. The information collection request (ICR) concerns the paperwork requirements in the regulations under 30 CFR 550, Subpart C, Pollution Prevention and Control.

**DATES:** Submit written comments by July 28, 2014.

**ADDRESSES:** Please send your comments on this ICR to the BOEM Information Collection Clearance Officer, Arlene Bajusz, Bureau of Ocean Energy Management, 381 Elden Street, HM–3127, Herndon, Virginia 20170 (mail); or [arlene.bajusz@boem.gov](mailto:arlene.bajusz@boem.gov) (email); or 703–787–1209 (fax). Please reference ICR 1010–0057 in your comment and include your name and return address.

**FOR FURTHER INFORMATION CONTACT:** Arlene Bajusz, Office of Policy, Regulations, and Analysis at (703) 787–1025 to request a copy of the ICR.

### SUPPLEMENTARY INFORMATION:

*Title:* 30 CFR part 550, Subpart C, Pollution Prevention and Control.  
*OMB Control Number:* 1010–0057.  
*Abstract:* The Outer Continental Shelf (OCS) Lands Act, as amended (43 U.S.C. 1331 *et seq.*, and 43 U.S.C. 1801 *et seq.*), authorizes the Secretary of the Interior (Secretary) to prescribe rules and regulations to manage the mineral resources of the OCS. Such rules and regulations apply to all operations conducted under a lease, right-of-use and easement, and pipeline right-of-way. Operations on the OCS must
