

Atlantic Fishery Management Council to prepare and amend fishery management plans for any fishery in waters under their jurisdictions. The National Oceanic and Atmospheric Administration (NOAA), National Marine Fisheries Service (NMFS) manages three individual fishing quota (IFQ)/individual transferable quota (ITQ) programs in the Southeast Region. In 1992, an ITQ program for commercial wreckfish in the South Atlantic Exclusive Economic Zone was implemented through Amendment 5 to the Fishery Management Plan for the Snapper-Grouper Fishery in the South Atlantic Region (South Atlantic Snapper-Grouper FMP). In 2007, a commercial red snapper IFQ program was implemented through Amendment 26 to the Fishery Management Plan for Gulf Reef Fish Resources in the Gulf of Mexico (Gulf Reef Fish FMP). In 2010, a commercial grouper and tilefish IFQ program was implemented through Amendment 29 to the Gulf Reef Fish FMP.

The collection of information addresses IFQ share certificate and allocation debits and transfers, as well as collection of landings information necessary to operate, administer, and review management of commercial red snapper, and grouper/tilefish in the Gulf of Mexico and wreckfish in the South Atlantic.

II. Method of Collection

Information for the Gulf red snapper and grouper/tilefish IFQ programs is collected via a web-based system, and through a 24-hour call hot line, with paper submission an option only in catastrophic circumstances.

The wreckfish share transfer process requires the signatures of witnesses. With only four respondents, it is not cost effective to set up an information technology system to handle this.

Estimated Total Annual Burden Hours: 2,303.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.
