

DEPARTMENT OF COMMERCE**Submission for OMB Review;
Comment Request**

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Reporting Requirements for the Ocean Salmon Fishery Off the Coasts of Washington, Oregon, and California.

OMB Control Number: 0648–0433.

Form Number(s): NA.

Type of Request: Regular submission (extension of a current information collection).

Number of Respondents: 40.

Average Hours Per Response: 15 minutes.

Burden Hours: 40.

Needs and Uses: This request is for extension of a currently approved information collection.

Based on the management regime specified each year, designated regulatory areas in the commercial ocean salmon fishery off the coasts of Washington, Oregon, and California may be managed by numerical quotas. To accurately assess catches relative to quota attainment during the fishing season, catch data by regulatory areas must be collected in a timely manner. Requirements to land salmon within specific time frames and in specific areas may be implemented in the preseason regulations to aid in timely and accurate catch accounting for a regulatory area. State landing systems normally gather the data at the time of landing. If unsafe weather conditions or mechanical problems prevent compliance with landing requirements, fishermen need an alternative to allow for a safe response. Fishermen would be exempt from landing requirements if the appropriate notifications are made to provide the name of the vessel, the port where delivery will be made, the approximate amount of salmon (by species) on board, and the estimated time of arrival.

Affected Public: Business or other for-profit organizations.

Frequency: On occasion.

Respondent's Obligation: Mandatory.

The king and Tanner crab fisheries in the exclusive economic zone of the Bering Sea and Aleutian Islands, Alaska, are managed under the Fishery Management Plan for Bering Sea and Aleutian Islands King and Tanner Crabs (FMP). The North Pacific Fishery Management Council prepared the FMP under the Magnuson-Stevens Fishery Conservation and Management Act as amended in 2006. National Marine Fisheries Service (NMFS) manages the crab fisheries in the waters off the coast of Alaska under the FMP. Regulations implementing the FMP and all amendments to the Crab Rationalization Program (CR Program) appear at 50 CFR part 680. Program details are found at: <http://www.alaskafisheries.noaa.gov/regs/680/default.htm>.

The CR Program balances the interests of several groups who depend on the crab fisheries. The CR Program addresses conservation and management issues associated with the previous derby fishery, reduces bycatch and associated discard mortality, and increases the safety of crab fishermen by ending the race for fish. Share allocations to harvesters and processors, together with incentives to participate in fishery cooperatives, increases efficiencies, provides economic stability, and facilitates compensated reduction of excess capacities in the harvesting and processing sectors. Community interests are protected by Western Alaska Community Development Quota allocations and regional landing and processing requirements, as well as by several community protection measures.

The NMFS established the CR Program as a catch share program for nine crab fisheries in the Bering Sea and Aleutian Islands (BSAI), and assigned quota share (QS) to persons and processor quota share (PQS) to processors based on their historic participation in one or more of these nine crab fisheries during a specific period. The CR Program components include QS allocation, PQS allocation, individual fishing quota (IFQ) issuance, and individual processing quota (IPQ) issuance, quota transfers, use caps, crab harvesting cooperatives, protections for

Gulf of Alaska groundfish fisheries, arbitration system, monitoring, economic data collection, and cost recovery fee collection. Revision: the eligible crab community organization (ECCO) annual report has been moved from OMB Control No. 0648-0570.

Affected Public: Business or other for-profit organizations.

Lightweight Thermal Paper From Germany: Final Results of Antidumping Duty Administrative Review; 2011-2012

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On December 16, 2013, the Department of Commerce (the Department) published the preliminary results of the administrative review of the antidumping duty order on lightweight thermal paper from Germany.¹ The period of review (POR) is November 1, 2011, through October 31, 2012. We invited interested parties to comment on the preliminary results. After reviewing the comments received and making one correction to the margin calculation program, we continue to find that Papierfabrik August Koehler SE (Koehler) did not make sales of subject merchandise at less than normal value. The final dumping margin for Koehler, listed below in the section entitled "Final Results of Review," is unchanged from the preliminary results. In addition, we find that Papierfabrik August Koehler SE is the successor-in-interest to Papierfabrik August Koehler AG.

DATES: Effective Date: June 18, 2014.

FOR FURTHER INFORMATION CONTACT: David Goldberger, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone (202) 482-4136.
