Subsistence Management Regulations for Public Lands in Alaska—2014–15 and 2015–16 Subsistence Taking of Wildlife Regulations

AGENCY: Forest Service, Agriculture; Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: This final rule establishes regulations for seasons, harvest limits, and methods and means related to the taking of wildlife for subsistence uses in Alaska during the 2014–15 and 2015–16 regulatory years. The Federal Subsistence Board (Board) completes the biennial process of revising subsistence hunting and trapping regulations in even-numbered years and subsistence fishing and shellfish regulations in odd-numbered years; public proposal and review processes take place during the preceding year. The Board also addresses customary and traditional use determinations during the applicable biennial cycle. This rulemaking replaces the wildlife taking regulations that expire on June 30, 2014. This rule also revises wildlife customary and traditional use determinations.

DATES: This rule is effective July 1, 2014.

ADDRESSES: The Board meeting transcripts are available for review at the Office of Subsistence Management, 1011 East Tudor Road, Mail Stop 121, Anchorage, Alaska 99503, or on the Office of Subsistence Management Web site (<http://www.doi.gov/subsistence/>

SUPPLEMENTARY INFORMATION:

Background

Under Title VIII of the Alaska National Interest Lands Conservation Act (ANILCA) (16 U.S.C. 3111–3126), the Secretary of the Interior and the Secretary of Agriculture (Secretaries) jointly implement the Federal Subsistence Management Program (Program). This Program grants a preference for subsistence uses of fish and wildlife resources on Federal public lands and waters in Alaska. The Secretaries first published regulations to carry out this program in the **Federal Register** on May 29, 1992 (57 FR 22940). These regulations have subsequently been amended several times. Because this Program is a joint effort between Interior and Agriculture, these regulations are located in two titles of the Code of Federal Regulations (CFR): Title 36, “Parks, Forests, and Public Property,” and Title 50, “Wildlife and Fisheries,” at 36 CFR 242.1–28 and 50 CFR 100.1–28, respectively. The regulations contain subparts as follows: Subpart A, General Provisions; Subpart B, Program Structure; Subpart C, Board Determinations; and Subpart D, Subsistence Taking of Fish and Wildlife.

Federal Subsistence Board

Consistent with subpart B of these regulations, the Secretaries established a Federal Subsistence Board to administer the Federal Subsistence Management Program. The Board comprises:

- A Chair, appointed by the Secretary of the Interior with concurrence of the Secretary of Agriculture;
- The Alaska Regional Director, U.S. Fish and Wildlife Service;

- The Alaska Regional Director, U.S. National Park Service;
- The Alaska State Director, U.S. Bureau of Land Management;
- The Alaska Regional Director, U.S. Bureau of Indian Affairs;
- The Alaska Regional Forester, U.S. Forest Service; and
- Two public members appointed by the Secretary of the Interior with concurrence of the Secretary of Agriculture.

Through the Board, these agencies and public members participate in the development of regulations for subparts C and D, which, among other things, set forth program eligibility and specific harvest seasons and limits.

Federal Subsistence Regional Advisory Councils

In administration of the Program, the Secretaries divided Alaska into 10 subsistence resource regions, each of which is represented by a Regional Advisory Council (Council). The Councils provide a forum for rural residents with personal knowledge of local conditions and resources to have a meaningful role in the subsistence management of fish and wildlife on Federal public lands in Alaska. The Council members represent diverse geographical, cultural, and user interests within each region.

The Board addresses customary and traditional use determinations during the applicable biennial cycle. Section __.24 (customary and traditional use determinations) was originally published in the **Federal Register** on May 29, 1992 (57 FR 22940). The regulations at 36 CFR 242.4 and 50 CFR 100.4 define “customary and traditional use” as “a long-established, consistent pattern of use, incorporating beliefs and customs which have been transmitted from generation to generation. . . .” Since 1992, the Board has made a number of customary and traditional use determinations at the request of affected subsistence users. Those modifications, along with some administrative corrections, were published in the **Federal Register** as follows:

Current Rule for Wildlife

The Departments published a proposed rule on January 11, 2013 (78 FR 2350), to amend the wildlife sections of subparts C and D of 36 CFR part 242 and 50 CFR part 100. The proposed rule opened a comment period, which closed on March 29, 2013. The Departments advertised the proposed rule by mail, email, Web page, radio, and newspaper. During that period, the Councils met and, in addition to other Council business, generated proposals and received suggestions for proposals from the public. The Board received a total of 57 proposals for changes to subparts C and D (2 were deemed invalid because the requested actions did not fall under the authority of the Board). After the comment period closed, the Board prepared a booklet describing the proposals and distributed it to the public. The proposals were also available online. The public then had an additional 45 days in which to comment on the proposals for changes to the regulations.

The 10 Regional Advisory Councils met again, received public comments, and formulated their recommendations to the Board on proposals for their respective regions. The Councils had a substantial role in reviewing the proposed rule and making recommendations for the final rule. Moreover, a Council Chair, or a designated representative, presented each Council's recommendations at the Board meeting on April 15–18, 2014. These final regulations reflect Board review and consideration of Regional Advisory Council recommendations,

Tribal and Alaska Native corporation consultations, and public comments. The public received extensive opportunity to review and comment on all changes.

Of the 55 valid proposals, 3 were withdrawn by the proponents, 26 were on the Board's regular (non-consensus) agenda, and 26 were on the consensus agenda. The consensus agenda is made up of proposals for which there is agreement among the affected Councils, a majority of the Interagency Staff Committee, and the Alaska Department of Fish and Game concerning a proposed regulatory action. Anyone may request that the Board remove a proposal from the consensus agenda and place it on the regular agenda. The Board votes en masse on the consensus agenda after deliberation and action on all other proposals. Of the proposals on the consensus agenda, the Board adopted 15; adopted 6 with modification; and rejected 5. Analysis and justification for the action taken on each proposal on the consensus agenda are available for review at the Office of Subsistence Management, 1011 East Tudor Road, Mail Stop 121, Anchorage, Alaska 99503, or on the Federal Subsistence Management Programs Web site (<http://www.doi.gov/subsistence/index.cfm>) or at <http://www.regulations.gov>. Of the proposals on the regular agenda, the Board adopted 5; adopted 13 with modification; rejected 4; and took no action on 4.

Summary of Non-Consensus Proposals Rejected or No Action Taken by the Board

The Board rejected or took no action on 8 non-consensus proposals. The rejected proposals were recommended for rejection by one or more of the Councils unless noted below.

The Board rejected a proposal to require antler destruction in Units 15B and 15C for moose. This proposal was determined to be detrimental to the satisfaction of subsistence needs.

The Board took no action on one proposal to revise season dates and permit requirements in Unit 18 for caribou based on its action on a similar proposal.

The Board took no action on three proposals to revise the area descriptor and harvest limits for a part of Unit 18 for moose based on its action on a similar proposal.

The Board rejected a proposal to lift a closure to non-Federally qualified users in Unit 25A (Arctic Village Sheep Management Area) for sheep. This proposal was determined to be detrimental to the satisfaction of subsistence needs.

The Board rejected a proposal to expand the boundary for Unit 26A for moose. This proposal was found to violate recognized principles of wildlife conservation and was not supported by substantial evidence. This action was contrary to the Council recommendation.

The Board rejected a proposal to lift a closure to non-Federally qualified users in Unit 26C for moose. This proposal was found to violate recognized principles of wildlife

conservation and be detrimental to the satisfaction of subsistence needs.

Summary of Non-Consensus Proposals Adopted by the Board

The Board adopted or adopted with modification 18 non-consensus proposals. Modifications were suggested by the affected Council(s), developed during the analysis process, suggested during Tribal and Alaska Native corporation consultations, or developed during the Board's public deliberations. All of the adopted proposals were recommended for adoption by at least one of the Councils unless noted below.

The Board adopted a proposal to establish a late season hunt for moose in Unit 6C, based on the portion of the antlerless moose quota not harvested in the early season hunt and to close public lands during the late season hunt except to Federally qualified users.

The Board adopted a proposal with modification to combine the harvest quota of two hunt sub-areas for goats in Unit 6D.

The Board adopted a proposal with modification to require a permit, revise the season dates, and set a harvest quota when using bait stations for black bear in Unit 6D.

The Board adopted a proposal with modification that limits the eligibility to harvest moose in a portion of Unit 7 to residents of Chenega Bay and Tatitlek only, should the season be opened.

The Board adopted a proposal to lift a closure in the Resurrection Creek Closed Area for the taking of moose in Unit 7.

The Board adopted a proposal with modifications to establish permit requirements for caribou in Units 9A, 9B, 9C, 17A, 17B, 17C, 18, 19A, and 19B, to revise the season dates in Units 17A and 17C, and revise the harvest limits in Unit 18.

The Board adopted a proposal with modification to establish a winter hunt for moose in a portion of Unit 11.

The Board adopted a proposal to revise the season dates for caribou in Unit 12.

The Board adopted a proposal with modification to revise the harvest limit and season dates for a "to be announced" hunt for moose in Unit 17A.

The Board adopted a proposal to extend the season dates and revise the area descriptor and harvest limits for moose in a portion of Unit 18.

The Board adopted a proposal to revise the area descriptor of the Paradise Controlled Use Area in Unit 21.

The Board adopted four proposals with modifications to revise the harvest limits, season dates, limit the number of permits issued, and adopt Section 804 priorities for musk ox in portions of Units 22B and 22D (the Board shall establish a priority among the rural Alaska residents when it is necessary to restrict the subsistence taking of fish and wildlife on public lands in order to protect the continued viability of those resources, or to continue subsistence uses).

The Board adopted a proposal to revise the harvest limit for sheep in a portion of Unit 24A by removing the requirement that a ram have a 7/8 curl or larger horn.

The Board adopted a proposal to allow the take of brown bears over bait in Unit 25D.

The Board adopted a proposal to remove certain harvest restrictions, revise the harvest limit and extend the season dates for moose in Unit 26C and portions of 26B.

These final regulations reflect Board review and consideration of Regional Advisory Council recommendations, Tribal and Alaska Native corporation consultations, and public comments. Because this rule concerns public lands managed by an agency or agencies in both the Departments of Agriculture and the Interior, identical text will be incorporated into 36 CFR part 242 and 50 CFR part 100.

Conformance With Statutory and Regulatory Authorities

Administrative Procedure Act Compliance

The Board has provided extensive opportunity for public input and involvement in compliance with Administrative Procedure Act requirements, including publishing a proposed rule in the **Federal Register** that opened a 78-day comment period, participation in multiple Regional Advisory Council meetings, additional public review and comment on all proposals for regulatory change, and opportunity for additional public comment during the Board meeting prior to deliberation. Additionally, an administrative mechanism exists (and has been used by the public) to request reconsideration of the Board's decision

on any particular proposal for regulatory change (36 CFR 242.20 and 50 CFR 100.20). Therefore, the Board believes that sufficient public notice and opportunity for involvement have been given to affected persons regarding Board decisions.

National Environmental Policy Act Compliance

A Draft Environmental Impact Statement (DEIS) for developing a Federal Subsistence Management Program was distributed for public comment on October 7, 1991. That document described the major issues associated with Federal subsistence management as identified through public meetings, written comments, and staff analyses and examined the environmental consequences of four alternatives. Proposed regulations (subparts A, B, and C) that would implement the preferred alternative were included in the DEIS as an appendix. The DEIS and the proposed administrative regulations presented a framework for a regulatory cycle regarding subsistence hunting and fishing regulations (subpart D). The Final Environmental Impact Statement (FEIS) was published on February 28, 1992.

Based on the public comments received, the analysis contained in the FEIS, and the recommendations of the Federal Subsistence Board and the Department of the Interior's Subsistence Policy Group, the Secretary of the Interior, with the concurrence of the Secretary of Agriculture, through the U.S. Department of Agriculture-Forest Service, implemented Alternative IV as identified in the DEIS and FEIS (Record of Decision on Subsistence Management for Federal Public Lands in Alaska (ROD), signed April 6, 1992). The DEIS and the selected alternative in the FEIS defined the administrative framework of a regulatory cycle for subsistence hunting and fishing regulations. The final rule for subsistence management regulations for public lands in Alaska, subparts A, B, and C, implemented the Federal Subsistence Management Program and included a framework for a regulatory cycle for the subsistence taking of wildlife and fish. The following **Federal Register** documents pertain to this rulemaking:

An environmental assessment was prepared in 1997 on the expansion of Federal jurisdiction over fisheries and is available from the office listed under **FOR FURTHER INFORMATION CONTACT**. The Secretary of the Interior with the concurrence of the Secretary of Agriculture determined that the expansion of Federal jurisdiction did not constitute a major Federal action significantly affecting the human environment and, therefore, signed a Finding of No Significant Impact.

Section 810 of ANILCA

An ANILCA section 810 analysis was completed as part of the FEIS process on the Federal Subsistence Management Program. The intent of all Federal subsistence regulations is to accord subsistence uses of fish and wildlife on

public lands a priority over the taking of fish and wildlife on such lands for other purposes, unless restriction is necessary to conserve healthy fish and wildlife populations. The final section 810 analysis determination appeared in the April 6, 1992, ROD and concluded that the Program, under Alternative IV with an annual process for setting subsistence regulations, may have some local impacts on subsistence uses, but will not likely restrict subsistence uses significantly.

During the subsequent environmental assessment process for extending fisheries jurisdiction, an evaluation of the effects of this rule was conducted in accordance with section 810. That evaluation also supported the Secretaries’ determination that the rule will not reach the “may significantly

restrict” threshold that would require notice and hearings under ANILCA section 810(a).

Paperwork Reduction Act

An agency may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. This rule does not contain any new collections of information that require OMB approval. OMB has reviewed and approved the collections of information associated with the subsistence regulations at 36 CFR part 242 and 50 CFR part 100, and assigned OMB Control Number 1018–0075, which expires February 29, 2016.

*Regulatory Planning and Review
(Executive Orders 12866 and 13563)*

Executive Order 12866 provides that the Office of Information and Regulatory Affairs (OIRA) in the Office of Management and Budget will review all significant rules. OIRA has determined that this rule is not significant.

Executive Order 13563 reaffirms the principles of E.O. 12866 while calling for improvements in the nation's regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. The executive order directs agencies to consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public where these approaches are relevant, feasible, and consistent with regulatory objectives. E.O. 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. We have developed this rule in a manner consistent with these requirements.

Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 et seq.) requires preparation of flexibility analyses for rules that will have a significant effect on a substantial number of small entities, which include small businesses, organizations, or governmental jurisdictions. In general, the resources to be harvested under this rule are already being harvested and consumed by the local harvester and do not result in an additional dollar benefit to the economy. Therefore, the Departments certify that this rulemaking will not have a significant economic effect on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

Small Business Regulatory Enforcement Fairness Act

Under the Small Business Regulatory Enforcement Fairness Act (5 U.S.C. 801 et seq.), this rule is not a major rule. It does not have an effect on the economy of \$100 million or more, will not cause a major increase in costs or prices for consumers, and does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises.

Executive Order 12630

Title VIII of ANILCA requires the Secretaries to administer a subsistence

priority on public lands. The scope of this Program is limited by definition to certain public lands. Likewise, these regulations have no potential takings of private property implications as defined by Executive Order 12630.

Unfunded Mandates Reform Act

The Secretaries have determined and certify pursuant to the Unfunded Mandates Reform Act, 2 U.S.C. 1502 et seq., that this rulemaking will not impose a cost of \$100 million or more in any given year on local or State governments or private entities. The implementation of this rule is by Federal agencies and there is no cost imposed on any State or local entities or tribal governments.

Executive Order 12988

The Secretaries have determined that these regulations meet the applicable standards provided in sections 3(a) and 3(b)(2) of Executive Order 12988, regarding civil justice reform.

Executive Order 13132

In accordance with Executive Order 13132, the rule does not have sufficient Federalism implications to warrant the preparation of a Federalism Assessment. Title VIII of ANILCA precludes the State from exercising subsistence management authority over fish and wildlife resources on Federal lands unless it meets certain requirements.

Executive Order 13175

The Alaska National Interest Lands Conservation Act does not provide rights to Tribes for the subsistence taking of wildlife, fish, and shellfish. However, the Board provided Federally recognized Tribes and Alaska Native corporations an opportunity to consult on this rule. Consultation with Alaska Native corporations is based on Public Law 108–199, div. H, Sec. 161, Jan. 23, 2004, 118 Stat. 452, as amended by Public Law 108–447, div. H, title V, Sec. 518, Dec. 8, 2004, 118 Stat. 3267, which provides that: “The Director of the Office of Management and Budget and all Federal agencies shall hereafter consult with Alaska Native corporations on the same basis as Indian tribes under Executive Order No. 13175.”

The Secretaries, through the Board, provided a variety of opportunities for tribal consultation: Submitting proposals to change the existing rule and commenting on proposed changes to the existing rule; engaging in dialogue at the Regional Advisory Council meetings; engaging in dialogue at the Board's meetings; and providing input in person, by mail, email, or phone at any time during this rulemaking

process. In addition, three teleconference opportunities were provided to allow for consultation with the Board in each of the 10 subsistence resource regions for Tribal entities and two specifically for Alaska Native corporations.

On April 15, 2014, the Board provided Federally recognized Tribes and Alaska Native corporations a specific final opportunity to consult on this rule. Federally recognized Tribes and Alaska Native corporations were notified by mail and telephone and were given the opportunity to attend in person or via teleconference.

Executive Order 13211

This Executive Order requires agencies to prepare Statements of Energy Effects when undertaking certain actions. However, this rule is not a significant regulatory action under E.O. 13211, affecting energy supply, distribution, or use, and no Statement of Energy Effects is required.

Subpart D—Subsistence Taking of Fish and Wildlife

■ 3. In subpart D of 36 CFR part 242 and 50 CFR part 100, § __.26 is revised to read as follows:

§ __.26 Subsistence taking of wildlife.

(a) You may take wildlife for subsistence uses by any method, except as prohibited in this section or by other Federal statute. Taking wildlife for subsistence uses by a prohibited method

is a violation of this part. Seasons are closed unless opened by Federal regulation. Hunting or trapping during a closed season or in an area closed by this part is prohibited.

(b) Except for special provisions found at paragraphs (n)(1) through (26) of this section, the following methods and means of taking wildlife for subsistence uses are prohibited:

(1) Shooting from, on, or across a highway.

(2) Using any poison.

(3) Using a helicopter in any manner, including transportation of individuals, equipment, or wildlife; however, this prohibition does not apply to transportation of an individual, gear, or wildlife during an emergency rescue operation in a life-threatening situation.

(4) Taking wildlife from a motorized land or air vehicle when that vehicle is in motion, or from a motor-driven boat when the boat's progress from the motor's power has not ceased.

(5) Using a motorized vehicle to drive, herd, or molest wildlife.

(6) Using or being aided by use of a machine gun, set gun, or a shotgun larger than 10 gauge.

(7) Using a firearm other than a shotgun, muzzle-loaded rifle, rifle, or pistol using center-firing cartridges for the taking of ungulates, bear, wolves, or wolverine, except that—

(i) An individual in possession of a valid trapping license may use a firearm that shoots rimfire cartridges to take wolves and wolverine; and

(ii) Only a muzzle-loading rifle of .54-caliber or larger, or a .45-caliber muzzle-loading rifle with a 250-grain, or larger, elongated slug may be used to take brown bear, black bear, elk, moose, musk ox, and mountain goat.

(8) Using or being aided by use of a pit, fire, artificial light, radio communication, artificial salt lick, explosive, barbed arrow, bomb, smoke, chemical, conventional steel trap with a jaw spread over 9 inches, or conibear style trap with a jaw spread over 11 inches.

(9) Using a snare, except that an individual in possession of a valid hunting license may use nets and snares to take unclassified wildlife, ptarmigan, grouse, or hares; and individuals in possession of a valid trapping license may use snares to take furbearers.

(10) Using a trap to take ungulates or bear.

(11) Using hooks to physically snag, impale, or otherwise take wildlife; however, hooks may be used as a trap drag.

(12) Using a crossbow to take ungulates, bear, wolf, or wolverine in any area restricted to hunting by bow and arrow only.

(13) Taking of ungulates, bear, wolf, or wolverine with a bow, unless the bow is capable of casting an inch-wide broadhead-tipped arrow at least 175 yards horizontally, and the arrow and broadhead together weigh at least 1 ounce (437.5 grains).

(14) Using bait for taking ungulates, bear, wolf, or wolverine; except you may use bait to take wolves and wolverine with a trapping license, and you may use bait to take black bears and brown bears with a hunting license as authorized in Unit-specific regulations at paragraphs (n)(1) through (26) of this section. Baiting of black bears and brown bears is subject to the following restrictions:

(i) Before establishing a bear bait station, you must register the site with ADF&G;

(ii) When using bait, you must clearly mark the site with a sign reading “black bear bait station” that also displays your hunting license number and ADF&G-assigned number;

(iii) You may use only biodegradable materials for bait; you may use only the head, bones, viscera, or skin of legally harvested fish and wildlife for bait;

(iv) You may not use bait within $\frac{1}{4}$ mile of a publicly maintained road or trail;

(v) You may not use bait within 1 mile of a house or other permanent dwelling, or within 1 mile of a developed campground or developed recreational facility;

(vi) When using bait, you must remove litter and equipment from the bait station site when done hunting;

(vii) You may not give or receive payment for the use of a bait station, including barter or exchange of goods; and

(viii) You may not have more than two bait stations with bait present at any one time;

(15) Taking swimming ungulates, bears, wolves, or wolverine.

(16) Taking or assisting in the taking of ungulates, bear, wolves, wolverine, or other furbearers before 3:00 a.m. following the day in which airborne travel occurred (except for flights in regularly scheduled commercial aircraft); however, this restriction does not apply to subsistence taking of deer, the setting of snares or traps, or the removal of furbearers from traps or snares.

(17) Taking a bear cub or a sow accompanied by cub(s).

(c) Wildlife taken in defense of life or property is not a subsistence use; wildlife so taken is subject to State regulations.

(d) The following methods and means of trapping furbearers for subsistence uses pursuant to the requirements of a trapping license are prohibited, in addition to the prohibitions listed at paragraph (b) of this section:

(1) Disturbing or destroying a den, except that you may disturb a muskrat pushup or feeding house in the course of trapping;

(2) Disturbing or destroying any beaver house;

(3) Taking beaver by any means other than a steel trap or snare, except that you may use firearms in certain Units with established seasons as identified in Unit-specific regulations found in this subpart;

(4) Taking otter with a steel trap having a jaw spread of less than $5\frac{7}{8}$ inches during any closed mink and marten season in the same Unit;

(5) Using a net or fish trap (except a blackfish or fyke trap); and

(6) Taking or assisting in the taking of furbearers by firearm before 3:00 a.m. on the day following the day on which airborne travel occurred; however, this

does not apply to a trapper using a firearm to dispatch furbearers caught in a trap or snare.

(e) *Possession and transportation of wildlife.* (1) Except as specified in paragraphs (e)(2) or (f)(1) of this section, or as otherwise provided, you may not take a species of wildlife in any unit, or portion of a unit, if your total take of that species already obtained anywhere in the State under Federal and State regulations equals or exceeds the harvest limit in that unit.

(2) An animal taken under Federal or State regulations by any member of a community with an established community harvest limit for that species counts toward the community harvest limit for that species. Except for wildlife taken pursuant to § 10(d)(5)(iii) or as otherwise provided for by this part, an animal taken as part of a community harvest limit counts toward every community member's harvest limit for that species taken under Federal or State of Alaska regulations.

(f) *Harvest limits.* (1) The harvest limit specified for a trapping season for a species and the harvest limit set for a hunting season for the same species are separate and distinct. This means that if you have taken a harvest limit for a particular species under a trapping season, you may take additional animals under the harvest limit specified for a hunting season or vice versa.

(2) A brown/grizzly bear taken in a Unit or portion of a Unit having a harvest limit of “one brown/grizzly bear per year” counts against a “one brown/grizzly bear every four regulatory years” harvest limit in other Units. You may not take more than one brown/grizzly bear in a regulatory year.

(g) *Evidence of sex and identity.* (1) If subsistence take of Dall sheep is restricted to a ram, you may not possess or transport a harvested sheep unless both horns accompany the animal.

(2) If the subsistence taking of an ungulate, except sheep, is restricted to one sex in the local area, you may not possess or transport the carcass of an animal taken in that area unless sufficient portions of the external sex organs remain attached to indicate conclusively the sex of the animal, except that in Units 1–5 antlers are also considered proof of sex for deer if the antlers are naturally attached to an entire carcass, with or without the viscera; and except in Units 11, 13, 19, 21, and 24, where you may possess either sufficient portions of the external sex organs (still attached to a portion of the carcass) or the head (with or without antlers attached; however, the antler stumps must remain attached) to indicate the sex of the harvested moose;

however, this paragraph (g)(2) does not apply to the carcass of an ungulate that has been butchered and placed in storage or otherwise prepared for consumption upon arrival at the location where it is to be consumed.

(3) If a moose harvest limit requires an antlered bull, an antler size, or configuration restriction, you may not possess or transport the moose carcass or its parts unless both antlers accompany the carcass or its parts. If you possess a set of antlers with less than the required number of brow tines on one antler, you must leave the antlers naturally attached to the unbroken, uncut skull plate; however, this paragraph (g)(3) does not apply to a moose carcass or its parts that have been butchered and placed in storage or otherwise prepared for consumption after arrival at the place where it is to be stored or consumed.

(h) *Removing harvest from the field.* You must leave all edible meat on the bones of the front quarters and hind quarters of caribou and moose harvested in Units 9, 17, 18, and 19B prior to October 1 until you remove the meat from the field or process it for human consumption. You must leave all edible meat on the bones of the front quarters, hind quarters, and ribs of moose harvested in Unit 21 prior to October 1 until you remove the meat from the field or process it for human consumption. You must leave all edible meat on the bones of the front quarters, hind quarters, and ribs of caribou and moose harvested in Unit 24 prior to October 1 until you remove the meat from the field or process it for human consumption. Meat of the front quarters, hind quarters, or ribs from a harvested moose or caribou may be processed for human consumption and consumed in the field; however, meat may not be removed from the bones for purposes of transport out of the field. You must leave all edible meat on the bones of the front quarters, hind quarters, and ribs of caribou and moose harvested in Unit 25 until you remove the meat from the field or process it for human consumption.

(i) *Returning of tags, marks, or collars.* If you take an animal that has been marked or tagged for scientific studies, you must, within a reasonable time, notify the ADF&G or the agency identified on the collar or marker when and where the animal was taken. You also must retain any ear tag, collar, radio, tattoo, or other identification with the hide until it is sealed, if sealing is required; in all cases, you must return any identification equipment to the ADF&G or to an agency identified on such equipment.

(j) *Sealing of bear skins and skulls.* (1) Sealing requirements for bear apply to brown bears taken in all Units, except as specified in this paragraph, and black bears of all color phases taken in Units 1–7, 11–17, and 20.

(2) You may not possess or transport from Alaska the untanned skin or skull of a bear unless the skin and skull have been sealed by an authorized representative of ADF&G in accordance with State or Federal regulations, except that the skin and skull of a brown bear taken under a registration permit in Units 5, 9B, 9E, 17, 18, 19A, and 19B downstream of and including the Aniak River drainage, 21D, 22, 23, 24, and 26A need not be sealed unless removed from the area.

(3) You must keep a bear skin and skull together until a representative of the ADF&G has removed a rudimentary premolar tooth from the skull and sealed both the skull and the skin; however, this provision does not apply to brown bears taken within Units 5, 9B, 9E, 17, 18, 19A, and 19B downstream of and including the Aniak River drainage, 21D, 22, 23, 24, and 26A and which are not removed from the Unit.

(i) In areas where sealing is required by Federal regulations, you may not possess or transport the hide of a bear that does not have the penis sheath or vaginal orifice naturally attached to indicate conclusively the sex of the bear.

(ii) If the skin or skull of a bear taken in Units 9B, 17, 18, and 19A and 19B downstream of and including the Aniak River drainage is removed from the area, you must first have it sealed by an ADF&G representative in Bethel, Dillingham, or McGrath; at the time of sealing, the ADF&G representative must remove and retain the skin of the skull and front claws of the bear.

(iii) If you remove the skin or skull of a bear taken in Units 21D, 22, 23, 24, and 26A from the area or present it for commercial tanning within the area, you must first have it sealed by an ADF&G representative in Barrow, Galena, Nome, or Kotzebue; at the time of sealing, the ADF&G representative must remove and retain the skin of the skull and front claws of the bear.

(iv) If you remove the skin or skull of a bear taken in Unit 5 from the area, you must first have it sealed by an ADF&G representative in Yakutat.

(v) If you remove the skin or skull of a bear taken in Unit 9E from Unit 9, you must first have it sealed by an authorized sealing representative. At the time of sealing, the representative must remove and retain the skin of the skull and front claws of the bear.

(4) You may not falsify any information required on the sealing certificate or temporary sealing form provided by the ADF&G in accordance with State regulations.

(k) *Sealing of beaver, lynx, marten, otter, wolf, and wolverine.* You may not possess or transport from Alaska the untanned skin of a marten taken in Units 1–5, 7, 13E, or 14–16 or the untanned skin of a beaver, lynx, otter, wolf, or wolverine, whether taken inside or outside the State, unless the skin has been sealed by an authorized representative in accordance with State or Federal regulations.

(1) In Unit 18, you must obtain an ADF&G seal for beaver skins only if they are to be sold or commercially tanned.

(2) In Unit 2, you must seal any wolf taken on or before the 14th day after the date of taking.

(l) If you take a species listed in paragraph (k) of this section but are unable to present the skin in person, you must complete and sign a temporary sealing form and ensure that the completed temporary sealing form and skin are presented to an authorized representative of ADF&G for sealing consistent with requirements listed in paragraph (k) of this section.

(m) You may take wildlife, outside of established season or harvest limits, for food in traditional religious ceremonies, which are part of a funerary or mortuary cycle, including memorial potlatches, under the following provisions:

(1) The harvest does not violate recognized principles of wildlife conservation and uses the methods and means allowable for the particular species published in the applicable Federal regulations. The appropriate Federal land manager will establish the number, species, sex, or location of harvest, if necessary, for conservation purposes. Other regulations relating to ceremonial harvest may be found in the unit-specific regulations in paragraph (n) of this section.

(2) No permit or harvest ticket is required for harvesting under this section; however, the harvester must be a Federally qualified subsistence user with customary and traditional use in the area where the harvesting will occur.

(3) In Units 1–26 (except for Koyukon/Gwich'in potlatch ceremonies in Units 20F, 21, 24, or 25):

(i) A tribal chief, village or tribal council president, or the chief's or president's designee for the village in which the religious/cultural ceremony will be held, or a Federally qualified subsistence user outside of a village or tribal-organized ceremony, must notify the nearest Federal land manager that a

wildlife harvest will take place. The notification must include the species, harvest location, and number of animals expected to be taken.

(ii) Immediately after the wildlife is taken, the tribal chief, village or tribal council president or designee, or other Federally qualified subsistence user must create a list of the successful hunters and maintain these records, including the name of the decedent for whom the ceremony will be held. If requested, this information must be available to an authorized representative of the Federal land manager.

(iii) The tribal chief, village or tribal council president or designee, or other Federally qualified subsistence user outside of the village in which the religious/cultural ceremony will be held must report to the Federal land manager the harvest location, species, sex, and number of animals taken as soon as practicable, but not more than 15 days after the wildlife is taken.

(4) In Units 20F, 21, 24, and 25 (for Koyukon/Gwich'in potlatch ceremonies only):

(i) Taking wildlife outside of established season and harvest limits is authorized if it is for food for the traditional Koyukon/Gwich'in Potlatch Funerary or Mortuary ceremony and if it is consistent with conservation of healthy populations.

(ii) Immediately after the wildlife is taken, the tribal chief, village or tribal council president, or the chief's or president's designee for the village in which the religious ceremony will be held must create a list of the successful hunters and maintain these records. The list must be made available, after the harvest is completed, to a Federal land manager upon request.

(iii) As soon as practical, but not more than 15 days after the harvest, the tribal chief, village council president, or designee must notify the Federal land manager about the harvest location, species, sex, and number of animals taken.

(n) *Unit regulations.* You may take for subsistence unclassified wildlife, all squirrel species, and marmots in all Units, without harvest limits, for the period of July 1–June 30. Unit-specific restrictions or allowances for subsistence taking of wildlife are identified at paragraphs (n)(1) through (26) of this section.

(1) *Unit 1.* Unit 1 consists of all mainland drainages from Dixon Entrance to Cape Fairweather, and those islands east of the center line of

Clarence Strait from Dixon Entrance to Caamano Point, and all islands in Stephens Passage and Lynn Canal north of Taku Inlet:

(i) Unit 1A consists of all drainages south of the latitude of Lemesurier Point including all drainages into Behm Canal, excluding all drainages of Ernest Sound.

The trapper must use the trapper's Alaska driver's license number or State identification card number as the required permanent identification number.
