

described in regulations pertaining to pesticidal substances that are produced by plants (plant-incorporated protectants) and which are codified in 40 CFR part 174. A plant-incorporated protectant is defined as “the pesticidal substance that is intended to be produced and used in a living plant and the genetic material necessary for the production of such a substance.” Many, but not all, plant-incorporated protectants are exempt from registration requirements under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). Registrants sometimes include in a submission to EPA for registration of plant-incorporated protectants information that they claim to be confidential business information (CBI). CBI is protected by FIFRA and generally cannot be released to the public. Under 40 CFR part 174, whenever a registrant claims that information submitted to EPA in support of a registration application for plant-incorporated protectants contains CBI, the registrant must substantiate such claims when they are made, rather than provide it later upon request by EPA. In addition, manufacturers of plant-incorporated protectants that are otherwise exempted from the requirements of registration must report adverse effects of the plant-incorporated protectant to the Agency. Such reporting will allow the Agency to determine whether further action is needed to prevent unreasonable adverse effects to the environment.

*Form Numbers:* None.

*Respondents/affected entities:* Entities potentially affected by this ICR include producers and importers of Plant Incorporated Protectants (PIPs). The North American Industrial Classification System (NAICS) codes for respondents under this ICR include: 325320 (Pesticide and other Agricultural Chemical Manufacturing), 325414 (Biological Products (except Diagnostic) Manufacturing), 422910 (Farm Supplies Wholesalers), 422930 (Flower, Nursery Stock, and Florists's Suppliers), 541710 (Research and Development in the Physical, Engineering, and Life Sciences), and 611310 (Colleges, Universities, and Professional Schools).

*Respondent's obligation to respond:* Mandatory.

*Estimated number of respondents:* 20.

*Frequency of response:* On occasion.

*Total estimated burden:* 432 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$31,371 (per year). There are no annualized capital or operation & maintenance costs associated with this ICR.

*Changes in the Estimates:* There is increase of 43 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase reflects EPA's updating of burden estimates for this collection based upon historical information on the number of CBI substantiations per year. Based upon revised estimates, the number of CBI substantiations per year has increased from 18 to 20, with a corresponding increase in the associated burden. This change is an adjustment.

This is a proposed extension of the ICR, which is currently approved through June 30, 2014, during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

### SUPPLEMENTARY INFORMATION:

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at [www.regulations.gov](http://www.regulations.gov) or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. **Abstract:** EPA promulgated revisions for the National Emission Standards for Hazardous Air Pollutants (NESHAP) for Group I Polymers and Resins. Potential respondents subject to the new requirements of the NESHAP include an estimated 5 existing facilities that produce butyl rubber, epichlorohydrin elastomer, ethylenepropylene rubber, neoprene rubber, and nitrile butadiene rubber. The burden attributable to this ICR consist of notification of front-end process vent limits, notification of backend operation limits, recordkeeping related to the new limits, and reports submitted to satisfy affirmative defense provisions.

*Form Numbers:* None.

*Respondents/affected entities:*

Owners and operators of facilities that produce butyl rubber, epichlorohydrin elastomer, ethylenepropylene rubber, neoprene rubber, and nitrile butadiene rubber.

*Respondent's obligation to respond:* Mandatory (40 CFR part 63, subpart U).

*Estimated number of respondents:* 5 (total).

*Frequency of response:* Initially, occasionally, and semiannually.

*Total estimated burden:* 315 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$16,791 (per year), includes no annualized capital/startup nor any operation & maintenance costs.

*Changes in the Estimates:* There is an increase of 64 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This is due to an adjustment, not due to any program changes. The respondent burden increased because this ICR revised the hours associated with affirmative defense, using latest estimates provided by industry during consultation. The previous ICR covers the burden associated with initial compliance of the final standard, including one-time notification of performance tests and notifications of the back-end process limits. This burden decreased because this ICR assumes that existing facilities have already submitted initial notifications and reports, and covers the burden associated with on-going compliance.
