(6) *An estimate of the total public burden (in hours) associated with the collection:* The estimated public burden associated with this collection is 1,282 hours. It is estimated that respondents will take 30 minutes to complete a questionnaire. The burden hours for collecting respondent data sum to 1,165 hours (2330 respondents' × .5 hours = 1,165 hours) and an additional 10% or 117 hours will be needed for data validation and follow-up contact with the respondents for nonresponse, incorrect or missing information.

SUPPLEMENTARY INFORMATION:

I. Background: The Army Unemployment Compensation for Ex-Servicemembers (UCX) Claimants' Initiative, funded by the U.S. Department of Labor, Employment and Training Administration (ETA), provides grants to four states to improve strategies for providing reemployment services to Army UCX claimants and for leveraging assets and sharing data across partners. The major goals of the initiative are to create a strong collaborative partnership among the Unemployment Insurance (UI) system, the public workforce system, and the three components of the Army (active, National Guard, and Reserve) that will support the rapid reemployment of UCX claimants; improve the sharing of UCX data that will lead to improved outreach and better understanding of UCX claimants and their service delivery needs; and increase outreach, exposure to jobs, and reemployment strategies for UCX claimants that fully leverage existing resources with new and innovative service delivery strategies. The period of performance for the grants is from July 1, 2012, to June 30, 2015.

The purpose of the evaluation, funded by the Chief Evaluation Office, is to determine the extent to which the initiative's goals were achieved by each of the four grantee states.

This package requests clearance for semi-structured discussions that will take place during a single round of two-day visits to each of the sites in the winter of 2014–2015. The site visits will involve an array of individuals that varies by state based on the projects that each state has decided to implement. Conversations will take place with grantee leaders, staff of an American Job Center, and representatives of the UI system in each state. Other discussants will include a suitable combination of representatives of the Army and UCX claimants in the initiative. The site visit will facilitate an assessment of the progress of these efforts, information gathering, and potential for the delivery of additional in-person technical assistance.

Currently, the Department of Labor is soliciting comments concerning the above data collection for Evaluation of the Army UCX Claimants Initiative. Comments are requested to:

- * evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

- * minimize the burden of the information collection on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

SUPPLEMENTARY INFORMATION:

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. That the application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modification.

II. Petitions for Modification

Docket Number: M-2014-022-C.

Petitioner: Mountain Coal Company, P.O. Box 591, 5174 Highway 133, Somerset, Colorado 81434.

Mine: West Elk Mine, MSHA I.D. No. 05-03672, located in Gunnison County, Colorado.

Regulation Affected: 30 CFR 75.1909(b)(6) (Nonpermissible diesel-powered equipment; design and performance requirements).

Modification Request: The petitioner requests that a previously granted petition for modification, Docket No. M-1999-113-C, be amended. The petitioner proposes to add two additional road Getman graders, model RDG-1504 serial number 7004, and model RDG-1504C serial number 6718. The maximum speed on the Getman graders will be limited to 10 miles per hour or less by blocking out gear ratios that would provide higher speeds. Grader operators will be trained to recognize appropriate levels of speed for different road conditions and slopes. Grader operators will be trained to lower the moldboard (grader blade) to provide additional stopping capability in emergencies.

Within 60 days after the Proposed Decision and Order becomes final, the petitioner will submit proposed revisions for its approved 30 CFR part 48 training plan to the District Manager. These revisions will specify initial and refresher training regarding the terms and conditions in the Proposed Decision and Order.
