

Company	2012 <i>Ad valorem</i> rate
Samwoo EMC Co., Ltd. .. TCC Steel Corp.	<i>de minimis.</i> <i>de minimis.</i>

Assessment Rates/Cash Deposits

In accordance with 19 CFR 351.212(b)(2), the Department intends to issue assessment instructions to U.S. Customs and Border Protection (CBP) 15 days after the date of publication of these final results of review to liquidate shipments of subject merchandise by respondents entered, or withdrawn from warehouse, for consumption on or after January 1, 2012, through December 31, 2012, without regard to CVDs because a *de minimis* subsidy rate was calculated for each company as the *ad valorem* assessment rate listed above. We will also instruct CBP to continue to suspend liquidation but to collect no cash deposits of estimated CVDs on shipments of the subject merchandise by the companies listed above entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of review.

For the companies for which this review is rescinded, countervailing duties shall be assessed at rates equal to the cash deposit of estimated countervailing duties required at the time of entry, or withdrawal from warehouse, for consumption, during the period January 1, 2012, through December 31, 2012, in accordance with 19 CFR 351.212(c)(1)(i).

For all non-reviewed companies, we will instruct CBP to continue to collect cash deposits at the most recent company-specific or country-wide rate applicable to the company. Accordingly, the cash deposit rates that will be applied to companies covered by this order, but not examined in this review, are those established in the most recently completed administrative proceeding for each company. The cash deposit rates for all companies not covered by this review are not changed by the results of this review, and remain in effect until further notice.

Return or Destruction of Proprietary Information

This notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply

with the regulations and the terms of an APO is a sanctionable violation.

We are issuing and publishing these final results in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: August 5, 2014.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Brass Sheet and Strip From France: Notice of Rescission of Antidumping Duty Administrative Review; 2013-2014

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) is rescinding the administrative review of the antidumping duty order on brass sheet and strip from France. The period of review is March 1, 2013, through February 28, 2014.

DATES: *Effective Date:* August 11, 2014.

FOR FURTHER INFORMATION CONTACT: Steve Bezirgianian, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-1131.

SUPPLEMENTARY INFORMATION:

Background

On March 3, 2014, the Department of Commerce (the Department) published in the **Federal Register** a notice of "Opportunity to Request Administrative Review" of the antidumping duty order on brass sheet and strip from France for the period of review (POR) of March 1,

2013, through February 28, 2014.¹ The Department received a timely request from GBC Metals, LLC, of Global Brass and Copper, Inc., dba Olin Brass, Heyco Metals, Inc., Aurubis Buffalo, Inc., PMX Industries, Inc., and Revere Copper Products, Inc. (the Petitioners) for an administrative review of the antidumping duty order on brass sheet and strip from France with respect to two companies, Griset SA and KME France.² On April 30, 2014, the Department published a notice of initiation of an administrative review of the antidumping duty order on brass sheet and strip from France with respect to Griset SA and KME France.³

The Department stated in its initiation of this review that it intended to rely on U.S. Customs and Border Protection (CBP) data to select respondents.⁴ However, our review of the CBP database, with respect to the companies for which this review was requested, showed no entries of subject merchandise during the POR. On May 20, 2014, we released the results of our CBP data query, and invited interested parties to comment on the results of that query.⁵ We received no comments on the results of that query. On July 14, 2014, the Petitioners submitted a letter withdrawing their request for review of the aforementioned companies.⁶

Rescission of Review

Section 351.213(d)(1) of the Department's regulations stipulates that the Secretary will rescind an administrative review under this section, in whole or in part, if a party that requested a review withdraws the request within 90 days of the date of publication of notice of initiation of the requested review. As the only parties that requested a review (the Petitioners) withdrew the request within 90 days of the date of publication of notice of initiation of the requested review, we are rescinding this review of the antidumping duty order on brass sheet

¹ See *Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity to Request Administrative Review*, 79 FR 11757 (March 3, 2014).

² See letter from the Petitioners' to the Secretary of Commerce entitled "Brass Sheet and Strip from France," dated March 31, 2014.

⁴ *Id.*

⁵ See Memorandum from Mark Flessner to the File entitled, "Brass Sheet and Strip from France: Placement on the Record of Results of Inquiry to U.S. Customs and Border Protection for 2013-2014 Period of Review," dated May 20, 2014.

⁶ See letter from the Petitioners to the Secretary of Commerce entitled, "Brass Sheet and Strip from France," dated July 14, 2014.

and strip from France pursuant to 19 CFR 351.213(d)(1).

Assessment

The Department will instruct U.S. Customs and Border Protection (CBP) to assess antidumping duties on all appropriate entries. Antidumping duties shall be assessed at rates equal to the cash deposit of estimated antidumping duties required at the time of entry or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(1)(i). The Department intends to issue appropriate assessment instructions directly to CBP 15 days after publication of this notice.

Notifications

This notice serves as a final reminder to importers for whom this review is being rescinded of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of the antidumping duties occurred and the subsequent assessment of double antidumping duties.

This notice also serves as a reminder to parties subject to administrative protective orders (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305, which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

This notice is issued and published in accordance with section 751(a)(1) of the Tariff Act of 1930, as amended, and 19 CFR 351.213(d)(4).

Dated: August 1, 2014.

Christian Marsh,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

Application(s) for Duty-Free Entry of Scientific Instruments

Pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, as amended by Pub. L. 106-36; 80 Stat. 897; 15 CFR part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with 15 CFR 301.5(a)(3) and (4) of the regulations and be postmarked on or before September 2, 2014. Address written comments to Statutory Import Programs Staff, Room 3720, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5:00 p.m. at the U.S. Department of Commerce in Room 3720.

Docket Number: 14-013. Applicant: Howard Hughes Medical University, 4000 Jones Bridge Road, Chevy Chase, MD 20815. Instrument: Vitrobot Vitrification Robot for Cryopreservation. Manufacturer: FEI, Czech Republic. Intended Use: The instrument is used to produce high-quality frozen-hydrated biological specimens for observation in cryo-TEM, to determine the structure of macromolecular biological complexes. It is equipped with an environmental chamber and fully automated control of blotting and plunge-freezing conditions. The computerized control of the humidity/temperature environment specimen chamber and blotting/freezing conditions is essential to reproducibly obtaining high quality samples for TEM, free of freezing artifacts. Justification for Duty-Free Entry: There are no instruments of the same general category manufactured in the United States. Application accepted by Commissioner of Customs: June 26, 2014.

Docket Number: 14-015. Applicant: South Dakota State University, Room 214 Daktronics Engineering Hall, South Dakota State University, Brookings, SD 57007. Instrument: SUNALE R-150 Atomic Layer Deposition Reactor. Manufacturer: Picosun, Finland. Intended Use: The instrument will be used to obtain ultrathin dielectric films with full coverage of semiconductor device surface to prevent electric leakage, and fabricate amorphous metal thin films, by depositing oxide films onto metal layer surfaces and studying the effect of the diode, in order to study

film uniformity, adhesion, dielectric constant, and optical constants. Unique features of the instrument include a dual vacuum chamber, which allows different reaction chambers to be fit into the same vacuum chamber, allowing easy scale up to batch process and deposition on different substrates, source lines that are pre-heated before entering the reactor chamber, improving the deposition quality, and the option of ultra-high vacuum system by using metal seal flanges. Another unique feature is the hot-wall reaction chamber, which allows a metal-metal sealing surface and pressure control that keeps all process gases inside the reaction chamber with no condensation occurring in the vacuum chamber walls. The reaction chamber walls are at the same temperature as the substrate which prevents secondary reaction routes inside the reaction chamber that would result in the loss of self-limited growth mechanism of ALD, ensures no corrosion occurs on the vacuum chamber walls, and ensures the best particle performance and long maintenance cycles, and a maximum deposition temperature of 500 degrees Celsius. Justification for Duty-Free Entry: There are no instruments of the same general category manufactured in the United States. Application accepted by Commissioner of Customs: July 1, 2014.

Docket Number: 14-019. Applicant: New Mexico Institute of Mining and Technology, 801 Leroy Place, Socorro, NM 87801. Instrument: Tip-Tilt/Narrow-field Acquisition System (FTT/NSA). Manufacturer: University of Cambridge—Cavendish Labs, United Kingdom. Intended Use: The instrument will be used to acquire the astronomical target by sensing its location in a moderate field of view image and using the position of the target relative to a pre-determined location in the sensor field of view to provide signals used to adjust the pointing of the telescope, and thereafter to detect and eliminate rapid tip-tilt (i.e. angle of arrival) fluctuations in the incoming light beam due to atmospheric turbulence—sensing these again by measuring the position of the target relative to a pre-determined location in the sensor field and using these measurements to send high frequency control signals to the active secondary mirror of the telescope and low frequency pointing corrections to the telescope mount. The unique features of the instrument are the interferometer system which is designed to fulfill the Science Reference Mission, including a focus on model-independent imaging as opposed to
