SUPPLEMENTARY INFORMATION:**A. Purpose**

Federal Acquisition Regulation clause 52.223–2, Affirmative Procurement of Biobased Products Under Service and Construction Contracts, requires prime contractors to report annually the product types and dollar values of U.S. Department of Agriculture (USDA)-designated biobased products purchased to the System for Award Management (SAM) Web site. The information reported by prime contractors enables Federal agencies to report annually to the Office of Federal Procurement Policy (OFPP) concerning actions taken to implement and measure progress in carrying out the preference for biobased products required under section 9002 of the Farm Security and Rural Investment Act of 2002, codified at 7 U.S.C. 8102.

B. Annual Reporting Burden

A reassessment of 52.223–2 was preformed. Based on the comprehensive reassessment performed, this information collection resulted in an increase in the total burden hours from the previous information collection that was published in the **Federal Register** at 76 FR 81940 on December 29, 2011. Federal Procurement Data System (FPDS) was searched to determine the number of unique DUNS numbers for the following selected Product Services Codes: A-Research and Development; F-Natural Resources Management; J-Maintenance, Repair, and Rebuilding of Equipment; M-Operation of Government-Owned Facility; S-Utilities and Housekeeping Services; T-Photographic, Mapping, Printing, and Publication Services; Y-Construction of Structures and Facilities; and Z-Maintenance, Repair or Alteration of Real Property. The clause will apply to the majority of the contract actions in the selected PSCs. The increase is likely a result of increased awareness of the biobased requirements and use of the contract clause in service and construction contracts.

Respondents: 64,123.

Responses per Respondent: 5.

Hours per Response: 5.

Total Burden Hours: 1,603,075.

C. Public Comments

Public comments are particularly invited on: Whether this collection of

information is necessary for the proper performance of functions of the FAR, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

Obtaining Copies of Proposals:

Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW., Washington, DC 20405, telephone 202–501–4755. Please cite OMB Control No. 9000–0180, Biobased Procurements, in all correspondence.

Dated: August 15, 2014.

SUPPLEMENTARY INFORMATION:

A. Purpose

The FAR requires certain information to be provided by contractors which would enable the Government to make payments under the contract by electronic fund transfer (EFT). The information necessary to make the EFT transaction is specified in clause 52.232–33, Payment by Electronic Funds Transfer—Central Contractor Registration, which the contractor is required to provide prior to award, and clause 52.232–34, Payment by Electronic Funds Transfer—Other than Central Contractor Registration, which requires EFT information to be provided as specified by the agency to enable payment by EFT.

B. Annual Reporting Burden

Respondents: 14,000.

Responses per Respondent: 10.

Annual Responses: 140,000.

Hours per Response: .5.

Total Burden Hours: 70,000.

C. Public Comment

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the FAR, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

BILLING CODE 6820–EP–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Justification for a Single Source Cooperative Agreement Award for the National Academy of Science

AGENCY: Office of the Assistant Secretary for Preparedness and Response, Department of Health and Human Services.

ACTION: Notice.

SUMMARY: The Department of Health and Human Services (HHS) Office of the Assistant Secretary for Preparedness and Response (ASPR) intends to provide a Single Source Cooperative Agreement Award to the National Academy of Science to establish a rapid and agile process for convening subject matter experts to address adverse health effects of public health emergencies and disasters when they occur. The goal of the process will be to prioritize scientific research needs in the immediate aftermath of a disaster that culminates in a summary report of the strategic science research questions most relevant to promote better

response, recovery or enhanced resilience in the affected community. Research results would also inform response to the next disaster event. Subject matter expertise would vary, depending on the nature of the emergency/disaster. This could include experts with background in public health, epidemiology, environmental health, emergency management, first response, emergency medicine, infectious diseases, nursing, emergency management, bioethics, medical countermeasures, state and local government, operations research, national civic organizations, and risk communication. The process convened by the Institute of Medicine (IOM) would also provide a connection to the local communities affected by the disaster, and include important stakeholders, such as non-government funders or other organizations. This cooperative Agreement will support ASPR's Government Performance and Results Act goals that “HHS will work with its Federal, state, local, tribal, and international partners to build community resilience and strengthen health and emergency response systems. Robust systems are essential to a secure and resilient. Nation with required capabilities to prevent, protect against, mitigate, respond to, and recover from the threats and hazards that pose the greatest risk. This includes strengthening the Federal medical and public health response capability”. Scientific research involved with preparedness and response is a key component of this endeavor.

DATES: *Period of Performance:* September 30, 2014 to September 29, 2015.

FOR FURTHER INFORMATION CONTACT: Please submit an inquiry via the ASPR Division of Grants Management at asprgrants@hhs.gov.

SUPPLEMENTARY INFORMATION: Pursuant to Sections 301. The Office of Policy and Planning is the program office for this award.

Justification: IOM is a nonprofit organization and is part of the National Academy of Sciences. IOM undertakes studies that may be specific mandates from Congress or requested by federal agencies and independent organizations.

IOM has an established Forum on Medical and Public Health Preparedness for Catastrophic Events. The Forum held a panel on Long-term Recovery of the Healthcare Service Delivery Infrastructure in February 2012 during the 2012 Public Health Preparedness Summit in Anaheim, California. The Forum's purpose is to foster dialogue
