

opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 et seq.) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The Standard on General Working Conditions in Shipyard Employment (29 CFR part 1915, subpart F) covers provisions that address conditions and operations in shipyard employment that may produce hazards for workers. The Subpart is comprised of 14 sections that include housekeeping; lighting; utilities; working alone; vessel radar and communication systems; lifeboats; medical services and first aid; sanitation; control of hazardous energy; safety color code for marking physical hazards; accident prevention signs and tags; retention of DOT markings, placards, and labels; motor vehicle safety equipment, operation and maintenance; and servicing multi-piece and single-piece rim wheels.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

The Agency is requesting an adjustment increase of 1,731 hours, from 99,645 to 101,376 hours. The increase in hours is a result of updated data showing an increase in the number of affected establishments covered by the standard from 2,725 to 2,759.

The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.

Type of Review: Extension of a currently approved collection.
