Abstract: EPA collects information regarding heavy-duty on-highway engines and vehicles, nonroad compression-ignition engines, and categories 1 and 2 marine compression-ignition engines (collectively referred to as “engines”). Title II of the Clean Air Act, (42 U.S.C. 7521 et seq.; CAA), charges EPA with issuing certificates of conformity for those engines that comply with applicable emission standards. Such a certificate must be issued before engines may be legally introduced into commerce. The information collected is necessary to (1) issue certificates of compliance with emissions standards and requirements; and (2) verify compliance with various programs and regulatory provisions. To apply for a certificate of conformity, manufacturers are required to submit descriptions of their planned production engines, including detailed descriptions of emission control systems and test data.

The emission values achieved during certification testing may also be used in the Averaging, Banking, and Trading (ABT) Program, which allows engine manufacturers to bank credits for engine families that emit below the standard and use the credits to certify engine families that emit above the standard and trade banked credits with other manufacturers. Participation in the ABT program is voluntary.

The CAA also mandates EPA to verify that manufacturers have successfully translated their certified prototypes into mass produced engines; and that these engines comply with emission standards throughout their useful lives. EPA verifies this through ‘Compliance Programs’ which include Production Line Testing (PLT), In-use Testing and Selected Enforcement Audits (SEAs). PLT, which only applies to marine engines, is a self-audit program that allows engine manufacturers to monitor

their products’ emissions profile with statistical certainty and minimize the cost of correcting errors through early detection. In-use testing allows manufacturers and EPA to verify compliance with emission standards throughout an engine family’s useful life. Through SEAs, EPA verifies that test data submitted by engine manufacturers is reliable and testing is performed according to EPA regulations.

The Transition Program for Equipment Manufacturers (TPEM) ICR (2060–0369) was incorporated into this ICR, to consolidate compliance information requirements for nonroad compression ignition engines and equipment under a single ICR. Under TPEM, nonroad equipment manufacturers are allowed to delay compliance with Tier 4 standards for up to seven years if they comply with certain limitations, easing the impact of new emission standards on equipment manufacturers. This is achieved by allowing additional time for equipment manufacturers to redesign their products in response to changes in engine designs. Participation in the program is voluntary requires to keep records and submit annual reports.

Manufacturers may assert a claim of confidentiality over information provided to EPA, which is granted in accordance with the FOIA and EPA regulations at 40 CFR Part 2.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), “Confidential Financial Disclosure Form for Special Government Employees Serving on Federal Advisory Committees at the U.S. Environmental Protection Agency (Renewal)” (EPA ICR No. 2260.05, OMB Control No. 2090–0029), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 et seq.). This is a proposed extension of the ICR, which is currently approved through August 31, 2014. Public comments were previously requested via the **Federal Register** (79 FR 35751) on June 24, 2014 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the

ICR is given below, including its estimated burden and cost to the public. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before September 26, 2014.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OA-2010-0757, to (1) EPA online using www.regulations.gov (our preferred method), by email to oei.docket@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460, and (2) OMB via email to oira_submission@omb.eop.gov. Abstract: The purpose of this information collection request is to assist the EPA in selecting federal advisory committee members who will be appointed as Special Government Employees (SGEs), mostly to the EPA's scientific and technical committees. To select SGE members as efficiently and cost effectively as possible, the Agency needs to evaluate potential conflicts of interest before a candidate is hired as an

SGE and appointed as a member to a committee by the EPA's Administrator or Deputy Administrator. Agency officials developed the "Confidential Financial Disclosure Form for Special Government Employees Serving on Federal Advisory Committees at the U.S. Environmental Protection Agency," also referred to as Form 3110-48, for greater inclusion of information to discover any potential conflicts of interest as recommended by the Government Accountability Office.

Form Numbers: EPA Form 3110-48.

Respondents/affected entities: Individuals.

Respondent's obligation to respond: Required in order to serve as a SGE on an EPA federal advisory committee (5 CFR 2634.903).

Estimated number of respondents: 250 (total).

Frequency of response: Annual.

Total estimated burden: 250 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$22,000 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the estimates: There is a decrease of 50 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This change is due to a decrease in the estimated number of respondents from 300 to 250.
