

3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Implementation Study of the Ramp Up to Readiness Program.

OMB Control Number: 1850-0907.

Type of Review: A revision of an existing information collection.

Respondents/Affected Public: Individuals or households.

Total Estimated Number of Annual Responses: 21,573.

Total Estimated Number of Annual Burden Hours: 6,059.

Abstract: This study will examine the implementation of Ramp-Up to Readiness, a schoolwide guidance intervention aimed at increasing the college readiness of students. This intervention (called Phase one) is at present being implemented in 34 high schools in Minnesota, and the developers intend to make the intervention available to a much larger set of Minnesota schools. No independently gathered high-quality evidence exists, however, on whether schools are able to implement this comprehensive intervention as intended or how its core components compare to the college-readiness supports in other high schools. The project for which OMB clearance is requested will attempt to gather such evidence from 22 public Minnesota high schools through the least burdensome means. The school-level implementation study will focus on assessing whether Ramp-Up school staff implement the program as

intended, on identifying the extent to which the Ramp-Up program differs from the college-readiness supports offered in schools without Ramp-Up, and on the validity of a measure of personal college readiness, which the developers hypothesize is a key mechanism through which the program impacts later outcomes. The study will collect data from school staff in the following activities: Administrative data collection, focus groups in January and June, extant document collection, instructional logs, student and staff surveys, and student personal readiness assessment. The findings produced through analysis of these data will help (1) state education agencies seeking strategies and programs to endorse as a potential means of improving students college readiness and college enrollment, (2) local education agencies that are considering the challenges of implementing Ramp-Up, (3) the developer of this intervention (the College Readiness Consortium at the University of Minnesota) and developers of other college readiness interventions who continually seek to improve their programs by using information from studies like this, and (4) a group of education stakeholders in the Midwest interested in considering whether to conduct a study of the impacts of the Ramp-Up intervention on student outcomes. The revision to the collection being requested is to add a phase two to the evaluation. For this second phase, the impact of the program is being examined in addition to the implementation of the program. Data will be collected from an additional 54 schools for this second phase of the evaluation.

Title: Clean Air Act Tribal Authority.

ICR numbers: EPA ICR No. 1676.05, OMB Control No. 2060-0306.

ICR Status: This ICR is scheduled to expire on 08/31/2014. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after

appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This Information Collection Request (ICR) seeks authorization for tribes to demonstrate their eligibility to be treated in the same manner as states under the Clean Air Act (CAA) and to submit applications to implement a CAA program. This ICR extends the collection period of information for determining eligibility, which expires August 31, 2014. The ICR maintains the estimates of burden costs for tribes in completing a CAA application.

The program regulation provides for Indian tribes, if they so choose, to assume responsibility for the development and implementation of CAA programs. The regulation, Indian Tribes: Air Quality Planning and Management (Tribal Authority Rule [TAR] 40 CFR parts 9, 35, 49, 50 and 81) sets forth how tribes may seek authority to implement their own air quality planning and management programs. The rule establishes: 1) Which CAA provisions Indian tribes may seek authority to implement, 2) what requirements the tribes must meet when seeking such authorization, and 3) what Federal financial assistance may be available to help tribes establish and manage their air quality programs. The TAR provides tribes the authority to administer air quality programs over all air resources, including non-Indian owned fee lands, within the exterior boundaries of a reservation and other areas over which the tribe can demonstrate jurisdiction. An Indian tribe that takes responsibility for a CAA program would essentially be treated in the same way as a state would be treated for that program.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15, and are identified on the form and/or instrument, if applicable.

Responses to the collection of information are required to obtain a benefit (40 CFR parts 9, 35, 49, 50 and 81). Any information submitted to the Agency for which a claim of confidentiality is made will be safeguarded according to the Agency policies set forth in Title 40, Chapter 1, part 2, subpart B—Confidentiality of
