above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: A Notice of Intent for the SPRNCA RMP and EIS was published on April 30, 2013 (78 FR 25299), with a 90-day scoping period that included scoping meetings during the summer. Due to public interest, the RMP scoping period was extended until September 27, 2013, for a total of 150 days. This document provides notice that the BLM Tucson Field Office, Tucson, Arizona, intends to prepare a TMP concurrent with the preparation of an RMP and associated EIS for the SPRNCA. It announces the beginning of the TMP scoping process, and seeks public input on travel and transportation issues and route designation within the SPRNCA. The SPRNCA, which encompasses 56,347 acres of public land located within Cochise County, Arizona, was designated by Congress on November 18, 1988. The Arizona-Idaho Conservation Act of 1988 (Pub. L. 100-696) established that the land must be managed to conserve, protect and enhance the riparian area and the aquatic, wildlife, archaeological, paleontological, scientific, cultural, educational, and recreational resources of the area. It also requires the designation of roads for motorized vehicle use be included in a comprehensive long-range plan for the area. Developing the TMP in conjunction with the RMP and associated EIS will satisfy this requirement. In addition to considering the designation of roads for motorized use, the TMP will identify and consider primitive roads and trails available for non-motorized use. Decisions in the TMP will be limited to BLM-administered land within the planning area boundary. The purpose of the public scoping process is to determine relevant issues that will influence the scope of the environmental analysis and alternatives to be considered in development of the TMP. Preliminary issues for the TMP have been identified by BLM personnel; Federal, State, and local agencies; and other stakeholders. They represent the BLM's knowledge to date of the existing issues and concerns with current management. Some of these issues and concerns include:

- Impacts to other public land users and adjacent private landowners;
- Impacts to wildlife habitat;
- Impacts to water quality, cultural sites, vegetation, including riparian and wetland areas, and soils; and
- Identification of recreational opportunities.
- Possible use of hierarchical mitigation strategies that include

avoidance, minimization, and compensation, on a local or regional scale, if appropriate.

The BLM will use NEPA public participation requirements to assist the agency in satisfying the public involvement requirements under Section 106 of the National Historic Preservation Act (NHPA) (16 U.S.C. 470 (f) pursuant to 36 CFR 800.2(d)(3). The information about historic and cultural resources within the area potentially affected by the proposed TMP will assist the BLM in identifying and evaluating impacts to such resources in the context of both NEPA and Section 106 of the NHPA. The BLM will consult with Indian tribes on a government-to-government basis in accordance with Executive Order 13175 and other policies. Tribal concerns, including impacts on Indian trust assets and potential impacts to cultural resources, will be given due consideration. Federal, State, and local agencies, along with tribes that may be interested in or affected by the proposed TMP the BLM is evaluating in conjunction with the SPRNCA RMP and associated EIS are invited to participate in the scoping process, and if eligible, may request or be requested by the BLM to participate in the development of the environmental analysis as a cooperating agency.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be publicly available at any time.
