SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA’s estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 et seq.) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to

reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The following is a description of the requirements in subparts A and B that pertain to the collection and retention of information.

One provision in subpart A contains paperwork requirements (§ 1915.7). Section 1915.7(b)(2) specifies that shipyard employers must maintain a roster of designated competent persons (for inspecting and testing spaces covered by subpart B), or a statement that a Marine Chemist will perform these inspections and tests. Section 1915.7(d) requires employers to ensure that competent persons, Marine Chemists, and certified industrial hygienists (CIHs) make a record of each inspection and test they conduct, post the record near the covered space while work is in progress, and file the record for at least three months. In addition, employers must make the roster or statement and the inspection and test records available for inspection by designated parties.

Subpart B consists of several standards governing entry into confined and enclosed spaces and other dangerous atmospheres in shipyard employment. These standards require that employers:

- Ensure that competent persons conduct inspections and atmospheric testing prior to workers entering a confined or enclosed space (§§ 1915.12(a)-(c));
- Warn workers not to enter hazardous spaces and other dangerous atmospheres (§§ 1915.12 (a)-(c) and § 1915.16);
- Certify that workers who will be entering confined or enclosed spaces have been trained (§ 1915.12(d)(5));
- Establish and train shipyard rescue teams or arrange for outside rescue teams and provide them with information (§ 1915.12(e));
- Ensure that one person on each rescue team maintains a current first aid training certification (§ 1915.12(e));
- Exchange information regarding hazards, safety rules, and emergency procedures concerning these spaces and atmospheres with other employers whose workers may enter these same spaces (§ 1915.12(f));
- Ensure testing of spaces containing or having contained combustible or flammable liquids or gases, or solids that are toxic, corrosive, or irritating and other dangerous atmospheres, boundaries or pipelines before cleaning and other cold work is started and as necessary thereafter while the operations are ongoing (§§ 1915.13(b)(2) and (4));
