

common analysis is potent and can greatly inform studies on the feeding behavior of whales in the region. The applicants would use standard dart-biopsy methods that have been used for more than 2 decades and are proven to be both humane and appropriate. A small sterilized stainless steel tip would be attached to the end of a customized crossbow bolt that has a flotation stopper engineered on to it. When the dart hits the whale, it penetrates the outermost skin and collects a ~10×5 mm sample of both skin and blubber. These samples are placed in sterilized cryovials and kept in –20 °C freezers until they are shipped frozen back to the labs for analysis. For satellite tagging, they are testing specific hypotheses regarding how the movement and behavior of humpback whales relates to that of their prey, Antarctic krill, and sea ice in the Antarctic environment. Satellite-transmitting tags offer the opportunity to track the movement of individual whales over long time periods and in relation to physical processes in their environment. They will deploy 10 satellite-linked implantable tags, designed to a maximum of 290mm into the back of the whale (generally just forward and to the left or right side of the dorsal fin). The tag is designed to penetrate just beneath the skin and hypodermis to anchor the tag. All external components of the tag are built from stainless steel and the tag is surgically sterilized prior to deployment. Each tag is deployed with the use of a compressed air gun. Once deployed, each tag turns on during the subsequent dive of the whale. Tags will then transmit upon each initial surfacing, and each 30 seconds of subsequent 'dry time' until the tag falls off the whale, malfunctions or the single AA lithium battery is exhausted. Investigators with significant experience in these methods would conduct both biopsy and satellite tagging.

Location: Antarctic Peninsula between Marguerite Bay and the Gerlache Strait, inshore waters.

Dates: January 1, 2015–December 31, 2018.

Nadene G. Kennedy,

Polar Coordination Specialist, Division of Polar Programs.

NATIONAL SCIENCE FOUNDATION

Advisory Committee for International Science and Engineering; Notice of Meeting

In accordance with Federal Advisory Committee Act (Pub., L. 92–463, as amended), the National Science Foundation announces the following meeting:

Name: Advisory Committee for International Science and Engineering Meeting, #25104.

Date/Time: November 6, 2014: 11 a.m. to 2 p.m.

Place: National Science Foundation, 4121 Wilson Boulevard, Stafford II—Suite 1155, Arlington, Virginia 22230.

Type of Meeting: OPEN, VIRTUAL.

Contact Person: Diane Drew, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230 703–292–7220.

Minutes: Meeting minutes and other information may be obtained from the AC–ISE Designated Federal Official at the above address or the Web site at <http://www.nsf.gov/od/iia/ise/advisory.jsp>.

Purpose of Meeting: To provide advice and recommendations on major goals and policies pertaining to International programs and activities.

Agenda

Thursday, November 6, 2014 11 a.m.–2 p.m.

- Welcome and Opening Remarks
- Update on the Status of the ISE Section
- Presentation and Discussion of the Report from the ISE Committee of Visitors
- Presentation and Discussion of the Strategic Framework for International Engagement
- Discussion of Other Recent Evaluations of NSF International Activities
- (Tentative) Meeting with France Córdova, NSF Director
- Closing Remarks and Wrap Up

Dated: October 17, 2014.

Suzanne Plimpton,

Acting Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

[Docket No. NRC–2014–0155]

Agency Information Collection Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on July 2, 2014.

1. *Type of submission, new, revision, or extension:* Extension.

2. *The title of the information collection:* NRC Form 483, "Registration Certificate—*In Vitro* Testing with Byproduct Material Under General License."

3. *Current OMB approval number:* 3150–0038.

4. *How often the collection is required:* There is a one-time submittal of information to receive a validated copy of NRC Form 483 with an assigned registration number. In addition, any changes in the information reported on NRC Form 483 must be reported in writing to the NRC within 30 days after the effective date of such change.

5. *Who will be required or asked to report:* Any physician, veterinarian in the practice of veterinary medicine, clinical laboratory or hospital which desires a general license to receive, acquire, possess, transfer, or use specified units of byproduct material in certain *in vitro* clinical or laboratory tests.

6. *An estimate of the number of annual responses:* 8 responses.

7. *The estimated number of annual respondents:* 8 respondents.

8. *An estimate of the total number of hours needed annually to complete the requirement or request:* 1.18 hours (1.07 hours reporting + 0.11 hour recordkeeping).

9. *Abstract:* Section 31.11 of Title 10 of the *Code of Federal Regulations* (10

CFR), establishes a general license authorizing any physician, clinical laboratory, veterinarian in the practice of veterinary medicine, or hospital to possess certain small quantities of byproduct material for *in vitro* clinical or laboratory test not involving the internal or external administration of the byproduct material or the radiation therefrom to human beings or animals. Possession of byproduct material under 10 CFR 31.11 is not authorized until the physician, clinical laboratory, veterinarian in the practice of veterinary medicine, or hospital has filed NRC Form 483 and received from the Commission a validated copy of NRC Form 483 with a registration number.

The public may examine and have copied for a fee publicly-available documents, including the final supporting statement, at the NRC's Public Document Room, Room O-1F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. The OMB clearance requests are available at the NRC's Web site: <http://www.nrc.gov/public-involve/doc-comment/omb/>. The document will be available on the NRC's home page site for 60 days after the signature date of this notice.

Comments and questions should be directed to the OMB reviewer listed below by November 24, 2014. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given to comments received after this date. Vlad Dorjets, Desk Officer, Office of Information and Regulatory Affairs (3150-0038), NEOB-10202, Office of Management and Budget, Washington, DC 20503.

Comments can also be emailed to Vladik_Dorjets@omb.eop.gov or submitted by telephone at 202-395-7315.

The NRC Clearance Officer is Tremaine Donnell, telephone: 301-415-6258.

Dated at Rockville, Maryland, this 20th day of October 2014.

For the Nuclear Regulatory Commission.

Tremaine Donnell,

NRC Clearance Officer, Office of Information Services.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 70-3098; NRC-2014-0235]

Shaw AREVA MOX Services; Mixed Oxide Fuel Fabrication Facility

AGENCY: Nuclear Regulatory Commission.

ACTION: Environmental assessment and finding of no significant impact; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is considering extending the expiration date for Construction Authorization (CA) CAMOX-001 issued to Shaw AREVA MOX Services for the Mixed Oxide Fuel Fabrication Facility on the Savannah River Site in Aiken, South Carolina.

ADDRESSES: Please refer to Docket ID NRC-2014-0235 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this action by the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2014-0235. Address questions about NRC dockets to Carol Gallagher; telephone: 301-287-3422; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the NRC Library at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced in this notice (if that document is available in ADAMS) is provided the first time that a document is referenced. The request to extend the construction authorization expiration date, dated May 16, 2014, is available in ADAMS under Accession No. ML14132A342.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: David Tiktinsky, Office of Nuclear Material Safety and Safeguards, U.S.

Nuclear Regulatory Commission; Washington, DC 20555-0001; telephone: 301-287-9155; email: David.Tiktinsky@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is considering extending the CA expiration date specified in CA CAMOX-001 issued to Shaw AREVA MOX Services (MOX Services) for the Mixed Oxide Fuel Fabrication Facility. The facility is located on the Department of Energy's Savannah River Site in Aiken, South Carolina. Therefore, as required by § 51.21 of Title 10 of the *Code of Federal Regulations* (10 CFR), the NRC performed an environmental assessment. Based on the results of the environmental assessment that follows, the NRC has determined not to prepare an environmental impact statement for the action of extending the expiration date of the construction authorization, and is issuing a finding of no significant impact.

II. Environmental Assessment

Identification of the Proposed Action

The proposed action would extend the expiration date of CA CAMOX-001 from March 30, 2015, to March 30, 2025. MOX Services submitted the CA extension request by letter dated May 12, 2014 (ADAMS Accession No. ML14132A342). MOX Services submitted the request to extend the CA at least 90 days before the expiration of the existing CA, therefore, in accordance with 10 CFR 2.109(a), the existing CA will remain in effect until the NRC staff has completed the review of the request.

The proposed extension will not expand the scope of any work to be performed that is not already allowed by the existing construction authorization. The extension will grant the MOX Services additional time to complete construction in accordance with the previously approved CA.

The Need for the Proposed Action

The proposed action is necessary to give the CA holder adequate time to complete construction of the Mixed Oxide Fuel Fabrication Facility. The CA for the MFFF was originally issued on March 30, 2005, with an expiration date of March 31, 2015. MOX Services has stated in their May 12, 2014, request that various factors have contributed to the need for an extension of the CA. The factors include: (a) The MFFF is a unique first of a kind facility of this type to be licensed in the United States under 10 CFR part 70; (b) annual funding/appropriations supporting construction activities have been less
