

- limitations for use of the *Galactomannan* assay;
- considerations for sample acquisition and documentation;
- analysis of study results; and
- performance characteristics of the assay.

Innovative and improved DDTs can help streamline the drug development process, improve the chances for clinical trial success, and yield more information about a treatment and/or disease. DDTs include, but are not limited to, biomarkers, clinical outcome assessments and animal models. Refer to DDTs Qualification Programs at <http://www.fda.gov/Drugs/DevelopmentApprovalProcess/DrugDevelopmentTools/QualificationProgram/default.htm> for additional information.

As stated previously in the **Federal Register** of January 7, 2014 (79 FR 831), FDA announced the availability of the guidance for industry entitled “Qualification Process for Drug Development Tools,” which described the process that would be used to qualify DDTs and to make new DDT qualification recommendations available on FDA’s Web site at <http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm>. CDER has developed this formal process to work with developers of these biomarker DDTs to guide the developers as they refine the tools and rigorously evaluate them for use in the regulatory context. Once qualified, DDTs will be publicly available for use in any drug development program for the qualified context of use. As described in the January 2014 guidance, biomarker DDTs should be developed and reviewed using this process.

This draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the Agency’s current thinking on *Galactomannan* in serum and BAL fluid. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.

II. The Paperwork Reduction Act of 1995

This guidance contains an information collection that is subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The information collection has been approved under the OMB control

numbers 0910–0001 and 0910–0014. The information requested in the guidance is currently submitted to FDA to support medical product effectiveness (see 21 CFR 312.30, 21 CFR 314.50(d)(5), and 21 CFR 314.126(b)(6)).
