14. Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023-01 and Commandant Instruction M16475.ID, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321-4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule involves establishing a temporary safety zone in the Kent Island Narrows to maintain public safety during repairs to the Kent Narrows (MD-18B) Draw Bridge. This action is necessary to protect persons and property during the project. This rule is categorically excluded from further review under paragraph 34(g) of Figure 2-1 of the Commandant Instruction. A preliminary environmental analysis checklist supporting this determination and a Categorical Exclusion Determination are available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

Fisheries Off West Coast States; Control Date for Large-Mesh Drift Gillnet Limited Entry Program

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Advance notice of proposed rulemaking (ANPR); request for comments.

SUMMARY: This ANPR announces a control date of June 23, 2014, that may be used as a reference for allocation decisions when considering potential future management actions to limit the number of participants in the large-mesh drift gillnet (DGN) fishery that targets swordfish and thresher sharks. The Pacific Fishery Management Council (Council) selected the June 23, 2014, control date based on discussions at its June meeting. The Council requested this ANPR to discourage speculative fishing effort as they review the current state-managed DGN limited entry program and consider establishing a federally-managed limited entry program for this fishery. This ANPR is intended to promote public awareness of the Council's interest and the potential for a future rulemaking.

DATES: June 23, 2014, shall be known as the control date for the large-mesh DGN fishery and may be used as a reference for allocations in a future management program that is consistent with the Council's objectives and applicable federal laws. Comments must be submitted in writing by November 28, 2014.
