SUPPLEMENTARY INFORMATION:

Title: Guidelines for Designating Biobased Products for Federal Procurement.

OMB Control Number: 0503-0011.

Type of Request: Extension of a currently approved information collection.

Abstract: The USDA BioPreferred Program provides that qualifying biobased products that fall under product categories (generic groups of biobased products) that have been designated for preferred procurement by rule making are required to be purchased by Federal agencies in lieu of their fossil energy-based counterparts, with certain limited exceptions. Further, USDA is required by section 9002 of the Farm Security and Rural Investment Act of 2002, as amended by the Food, Conservation, and Energy Act of 2008 and the Agricultural Act of 2014, to provide certain information on qualified biobased products to Federal agencies. To meet these statutory requirements, USDA will gather that information from manufacturers and vendors of biobased products. The information sought by USDA can be transmitted electronically using the Web site <http://www.biopreferred.gov>. If for any reason the requested information cannot be electronically transmitted, USDA will provide technical assistance to support the transmission of information to USDA. The information collected will enable USDA to meet statutory information requirements that will then permit USDA to designate product categories for preferred procurement under the BioPreferred Program. Once product categories are designated, manufacturers and vendors of qualifying biobased products that fall under these designated product categories will benefit from preferred procurement by Federal agencies.

Estimate of Burden: Public reporting burden for this collection of information

is estimated to average 40 hours per response.

Respondents: Manufacturers and vendors of biobased products.

Estimated Annual Number of Respondents: 220.

Estimated Number of Responses per Respondent: One per manufacturer or vendor.

Estimated Total Annual Burden on Respondents: 8,800 hours, one time only. Manufacturers and vendors are asked to respond only once. Therefore, there is no ongoing annual paperwork burden on respondents.

Comments are invited on: (1) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record.

Dated: October 29, 2014.

Gregory L. Parham,

Assistant Secretary For Administration, U.S. Department of Agriculture.

SUPPLEMENTARY INFORMATION:

Background

The NACMCF was established in 1988, in response to a recommendation of the National Academy of Sciences for an interagency approach to microbiological criteria for foods, and in response to a recommendation of the U.S. House of Representatives Committee on Appropriations, as expressed in the Rural Development, Agriculture, and Related Agencies Appropriation Bill for fiscal year 1988. The charter for the NACMCF is available on the FSIS Web page at <http://www.fsis.usda.gov/wps/portal/fsis/topics/data-collection-and-reports/nacmcf/committee-charter/charter>.

The NACMCF provides scientific advice and recommendations to the Secretary of Agriculture and the Secretary of Health and Human Services on public health issues relative to the safety and wholesomeness of the U.S. food supply, including development of microbiological criteria, as well as the review and evaluation of epidemiological and risk assessment data and methodologies for assessing microbiological hazards in foods. The Committee also provides scientific advice and recommendations to the Food and Drug Administration, the Centers for Disease Control and Prevention, and the Departments of Commerce and Defense.

Mr. Brian Ronholm, Deputy Under Secretary for Food Safety, USDA, is the Committee Chair; Mr. Michael Landa, Acting Director of the Food and Drug Administration's Center for Food Safety and Applied Nutrition (CFSAN), is the Vice-Chair; and Dr. James Rogers, FSIS, is the Executive Secretary.

Meeting Agenda

At its November 17, 2014, meeting, the full Committee will continue discussions on:

Microbiological criteria as indicators of poor process control or insanitary conditions, and

Control strategies for reducing foodborne transmission of Norovirus infections.

The Committee took up the first topic in response to a Department of Defense (DoD) request for guidance on refined microbiological and other possible criteria for better evaluating process control and insanitary conditions at food production facilities.

The second topic responds to a request for guidance on a unified approach to reducing illness from human noroviruses (HuNoVs). FSIS, the Food and Drug Administration, the Centers for Disease Control and Prevention, and the DoD Veterinary Services Activity (DoDVSA) all sought this guidance.
