

## Background

Codex was established in 1963 by two United Nations organizations, the Food and Agriculture Organization and the World Health Organization. Through adoption of food standards, codes of practice, and other guidelines developed by its committees, and by promoting their adoption and implementation by governments, Codex seeks to protect the health of consumers and ensure that fair practices are used in trade.

The CCMAS is responsible for defining the criteria appropriate to Codex Methods of Analysis and Sampling; serving as a coordinating body for Codex with other international groups working in methods of analysis and sampling and quality assurance systems for laboratories; specifying the basis of final recommendations submitted to it by other bodies; considering, amending, and endorsing, methods of analysis and sampling proposed by Codex (Commodity) Committees, except that methods of analysis and sampling for residues of pesticides or veterinary drugs in food, the assessment of microbiological quality and safety in food, and the assessment of specifications for food additives do not fall within the terms of reference of this Committee. The Committee is charged with elaborating sampling plans and procedures; considering specific sampling and analysis problems submitted to it by the Commission or any of its Committees; defining procedures, protocols, guidelines, or related texts for the assessment of food laboratory proficiency; and developing quality assurance systems for laboratories.

The Committee is hosted by Hungary.
