Registration Review; Pesticide Dockets Opened for Review and Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: With this document, EPA is opening the public comment period for several registration reviews. Registration review is EPA's periodic review of pesticide registrations to ensure that each pesticide continues to satisfy the statutory standard for registration, that is, the pesticide can perform its intended function without unreasonable adverse effects on human health or the environment. Registration review dockets contain information that will assist the public in understanding the types of information and issues that the Agency may consider during the course of registration reviews. Through this program, EPA is ensuring that each pesticide's registration is based on current scientific and other knowledge, including its effects on human health and the environment. This document also announces the Agency's intent to close the registration review case for tebufenpyrad, imazamethabenz, and 2-((hydroxymethyl)-amino)ethanol (also known as HMAE). These pesticides do not currently have any actively registered pesticide products and, therefore, the Agency is closing the registration review cases for tebufenpyrad, imazamethabenz, and HMAE.

For phenmedipham, EPA is seeking comment on the preliminary work plan, the ecological problem formulation, and the human health draft risk assessment.
