

National Historic Preservation Act

Final cultural resource reports and effects determination were sent to the Nebraska State Historical Preservation Officer (SHPO) and were subsequently approved. A Memorandum of Agreement addressing effects to properties on or eligible for listing on the National Register of Historic Places for the preservation of eligible properties was signed by Grand Prairie Wind, the SHPO, and Western on March 25, 2015, in compliance with the National Historic Preservation Act.

Comments on the Final EIS

One comment was received by the U.S. Environmental Protection Agency (EPA). In their February 17, 2015, letter, EPA recommended additional alternatives be considered in Western's future NEPA documents.

Decision

Western's decision is to execute an interconnection agreement with Grande Prairie Wind to interconnect their proposed Project to Western's transmission system and to construct, own, and operate a new switchyard adjacent to its Fort Thompson to Grand Island 345-kV transmission line to accommodate that interconnection.² Western's decision to grant this interconnection request satisfies the agency's statutory mission and Grande Prairie Wind's objectives while minimizing harm to the environment. Full implementation of this decision is contingent upon Grande Prairie Wind's obtaining all other applicable permits and approvals as well as executing an interconnection agreement in accordance with Western's Tariff. This decision is based on the information contained in the Interconnection of the Grande Prairie Wind Farm Final EIS. This ROD was prepared pursuant to the requirements of the Council on Environmental Quality Regulations for Implementing the Procedural Provisions of the NEPA (40 CFR parts 1500–1508) and DOE's NEPA Implementing Procedures (10 CFR part 1021).

Dated: April 20, 2015.

Administrator.

ICR status: This ICR is currently scheduled to expire on April 30, 2015. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Under PRA, 44 U.S.C. 3501 *et seq.*, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Section 1018 of the Residential Lead Based Paint Hazard Reduction Act (42 U.S.C. 4852d) requires that sellers and lessors of most residential housing built before 1978 disclose known information on the presence of lead based paint and lead based paint hazards, and provide an EPA approved pamphlet to purchasers and renters before selling or leasing the housing. Sellers of pre-1978 housing are also required to provide prospective purchasers with ten days to conduct an inspection or risk assessment for lead based paint hazards before obligating purchasers under contracts to purchase the property. The rule does not apply to rental housing that has been found to be free of lead-based paint, zero-bedroom dwellings, housing for the elderly, housing for the handicapped, or short term leases.

Responses to the collection of information are mandatory (see 40 CFR part 745, subpart F, and 24 CFR part 35, subpart H). Respondents may claim all

or part of a response confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

Form Numbers: None.

Respondents/affected entities:

Persons engaged in selling or leasing certain residential dwellings built before 1978, or who are real estate agents representing such parties.

Respondent's obligation to respond: Mandatory.

Estimated number of respondents: 39,645,600.

Frequency of response: On occasion.

Total estimated burden: 6,467,176 hours per year. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$125,683,576 per year, includes \$0 annualized capital or operation and maintenance costs.

Changes in the estimates: There is a decrease of 470,154 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease reflects a gradual reduction in the annual number of real estate sales involving target housing subject to the rule's requirements and an overall decrease in real estate sales. There has also been a notable decrease in the overall growth of the real estate agent profession which reduces the number of new entrants who have start-up burden and cost related to this ICR activity. While the number of property rentals increased over the past year, fewer parties are involved in those transactions so the increases in the rental market were not enough to offset the decrease in the sales market in terms of burden and cost related to this ICR.

Authority: 44 U.S.C. 3501 *et seq.*

Acting Director, Collection Strategies Division.

Abstract: This information collection involves third-party notification to owners and occupants of housing that will inform such individuals about the dangers of lead-contaminated dust and lead-based paint debris that are sometimes generated during renovations of housing where lead-based paint is present, thereby aiding them in avoiding potentially hazardous exposures and protecting public health. Since young children are especially susceptible to the hazards of lead, owners and occupants with children can take action to protect their children from lead poisonings. Section 406(b) of the Toxic Substances Control Act (TSCA) requires EPA to promulgate regulations requiring certain persons who perform renovations for compensation on target housing to provide a lead hazard information pamphlet (developed under TSCA section 406(a)) to the owner and occupants of such housing prior to beginning the renovation. Further, the firm performing the renovation must keep records acknowledging receipt of the pamphlet on file for three years after completion of work. Those who fail to provide the pamphlet or keep records as required may be subject to both civil and criminal sanctions.

Responses to the collection of information are mandatory (see 40 CFR part 745, subpart E). Respondents may claim all or part of a response confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.
