SUPPLEMENTARY INFORMATION:

I. Background

In accordance with § 51.118 of Title 10 of the *Code of Federal Regulations*, the NRC is making available final Supplement 52 to the GEIS regarding the renewal of FENOC operating license NPF–3 for an additional 20 years of operation for Davis-Besse. Draft Supplement 52 to the GEIS was noticed by the NRC in the **Federal Register** on March 7, 2014 (79 FR 13079), and

noticed by the Environmental Protection Agency on March 21, 2014 (79 FR 15741). The public comment period on draft Supplement 52 to the GEIS ended on April 21, 2014, and the comments received are addressed in final Supplement 52 to the GEIS. Final Supplement 52 to the GEIS is available as indicated in the **ADDRESSES** section of this document, and is available for public inspection at the Toledo-Lucas County Public Library, 325 Michigan Street, Toledo, Ohio 43604; and at the Ida Rupp Public Library, 310 Madison Street, Port Clinton, Ohio 43452.

II. Discussion

As discussed in Section 9.4 of the final Supplement 52 to the GEIS, the NRC determined that the adverse environmental impacts of license renewal for Davis-Besse are not so great that preserving the option of license renewal for energy-planning decisionmakers would be unreasonable. This recommendation is based on: (1) The analysis and findings in the GEIS; (2) information provided in the environmental report and other documents submitted by FENOC; (3) consultation with Federal, State, local, and Tribal agencies; (4) the NRC staff’s independent environmental review; and (5) consideration of public comments received during the scoping process and on the Draft Supplemental Environmental Impact Statement.

Dated at Rockville, Maryland, this 29th day of April 2015.

For the Nuclear Regulatory Commission.

Brian D. Wittick,

Chief, Projects Branch 2, Division of License Renewal, Office of Nuclear Reactor Regulation.

SUPPLEMENTARY INFORMATION:

I. Introduction

Under section 2.106 of Title 10 of the
Code of Federal Regulations (10 CFR),
the NRC is providing notice of the
issuance of COL NPF–95 to DTE and,
under 10 CFR 51.102(c), the Record of
Decision (ROD). With respect to the
application for the COL filed by DTE,
the NRC finds that the applicable
standards and requirements of the
Atomic Energy Act of 1954, as amended,

and the Commission's regulations have
been met. The NRC finds that any
required notifications to other agencies
or bodies have been duly made and that
there is reasonable assurance that the
facility will be constructed and will
operate in conformity with the license,
as amended, the provisions of the Act,
and the Commission's regulations.
Furthermore, the NRC finds that the
licensee is technically and financially
qualified to engage in the activities
authorized, and that issuance of the
license will not be inimical to the
common defense and security or to the
health and safety of the public. Finally,
the NRC finds that the findings required
by subpart A of 10 CFR part 51 have
been made.

Accordingly, the COL was issued on
May 1, 2015, and is effective
immediately.

II. Further Information

The NRC has prepared a Final Safety
Evaluation Report (FSER) and Final
Environmental Impact Statement (FEIS)
that document the information reviewed
and NRC's conclusion. The Commission
has also issued its Memorandum and
Order documenting its final decision on
the uncontested hearing held on
February 4, 2015, which serves as the
Record of Decision ROD in this
proceeding. The NRC also prepared a
document summarizing the ROD to
accompany its action on the COL
application that incorporates by
reference materials contained in the
FEIS. In accordance with 10 CFR 2.390
of the NRC's “Rules of Practice,” details
with respect to this action, including the
FSER FEIS, Summary ROD, and
accompanying documentation included
in the combined license package, as
well as the Commission's hearing
decision and ROD, are available online
in the ADAMS Public Documents
collection at [http://www.nrc.gov/
reading-rm/adams.html](http://www.nrc.gov/reading-rm/adams.html). From this site,
persons can access the NRC's ADAMS,
which provides text and image files of
NRC's public documents.
