Notice of Intent to Prepare an Environmental Impact Statement for the Rahway River Basin Flood Risk Management Study

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of Intent.

SUMMARY: In compliance with the National Environmental Policy Act (NEPA), the U.S. Army Corps of Engineers, New York District (Corps) in partnership with the New Jersey Department of Environmental Protection (NJDEP) as the non-federal sponsor, is preparing an integrated Feasibility

Report/Environmental Impact Statement (EIS) in accordance with Council on Environmental Quality's NEPA regulations; Corps' principles and guidelines as defined in Engineering Regulations (ER) 1105-2-100, Planning Guidance Notebook, and ER 200-2-2, Procedures for Implementing NEPA; and other applicable Federal and State environmental laws for the proposed Rahway River Basin Flood Risk Management Feasibility Study. The study is assessing the feasibility of flood risk management alternatives to be implemented within the congressionally authorized study area with a specific emphasis on the Township of Cranford and the City of Rahway in Union County, New Jersey.

The District was authorized under U.S. House of Representatives Resolution Docket 2548, dated March 24, 1998 to identify recommendations in the interest of water resources development.

ADDRESSES: Send written comments and suggestions concerning the scope of issues to be evaluated within the EIS to Kimberly Rightler, Project Biologist/NEPA Coordinator, U.S. Army Corps of Engineers, New York District, Planning Division, Environmental, 26 Federal Plaza, New York, NY 10279-0090; Phone: (917) 790-8722; email: kimberly.a.rightler@usace.army.mil.

SUPPLEMENTARY INFORMATION:

1. Background

The U.S. Army Corps of Engineers (Corps), in partnership with the New Jersey Department of Environmental Protection (NJDEP), is undertaking this study. Flooding within the Rahway River Basin is caused principally by the rapid development of the area, which has resulted in a large increase of stormwater runoff into the Rahway River and its tributaries. The increased runoff coupled with inadequate channel capacities and bridge openings account for most of the flooding problems.

Storm events in the Rahway River Basin which caused significant damage are the storms of July 1938, May 1968, August 1971, August 1973, November 1977, July 1979, June 1992, October

1996, July 1997, Tropical Storm Floyd in September 1999, April 2007 and Tropical Storm Irene in August 2011.

In response to locals concerns regarding flooding, Congress funded the Corps to conduct a reconnaissance study of the Rahway River Basin. In July 1999, the Corps issued a favorable reconnaissance report recommending that a feasibility study be conducted to develop flood risk management alternatives in the Rahway River Basin. The NJDEP concurred with the Corps' reconnaissance study recommendations and signed a Feasibility Cost Sharing Agreement (FCSA) on March 14, 2002 to cost share the feasibility study. While an entire basin study was authorized, an initial screening conducted in 2006 determined that Cranford and the City of Rahway had the greatest potential for Federal Interest.

Subsequent of Hurricane Irene in August 2011, local stakeholders requested the Corps, through NJDEP, to investigate potential flood storage opportunities outside/upstream of the Township of Cranford that would benefit not only Cranford but other municipalities as well. As part of their request, the local stakeholders presented several alternatives. As a result, the Corps conducted a preliminary alternative analysis to determine those alternatives that should be considered for further evaluation.

In total, eight alternatives were developed and are listed below:

1. Cranford Alternative 1: Channel Improvements and Modification to the Lenape Park Levees
2. Cranford Alternative 2: Channel Improvements and modification to the Nomahegan Park Levees and Lenape Park Levees
3. Cranford Alternative 3: Channel Improvements and dredging Orange Reservoir
4. Cranford Alternative 4: Channel Improvements and new outlet at Orange Reservoir
5. Cranford Alternative 5: Channel Improvements and South Mountain Regional Detention Basin
6. Cranford Alternative 5a: Channel Improvements and South Mountain Regional Detention Basin with relocation of Brookside Drive
7. Cranford Alternative 6: South Mountain Regional Detention Basin
8. Cranford Alternative 6a: South Mountain Regional Detention Basin with relocation of Brookside Drive
9. Cranford Alternative 7: Nonstructural 10 year flood plain in Cranford
10. Cranford Alternative 7a: Nonstructural-100-yr floodplain in Cranford
