Abstract: Section 4 of the Endangered Species Act (ESA) (16 U.S.C. 1531 *et seq.*) specifies the process by which we

can list species as threatened or endangered. When we consider whether or not to list a species, the ESA requires

us to take into account the efforts being made by any State or any political subdivision of a State to protect such

species. We also take into account the efforts being made by other entities. States or other entities often formalize conservation efforts in conservation agreements, conservation plans, management plans, or similar documents. The conservation efforts recommended or called for in such documents could prevent some species from becoming so imperiled that they meet the definition of a threatened or endangered species under the ESA.

The Policy for Evaluation of Conservation Efforts When Making Listing Decisions (PECE) (68 FR 15100, March 28, 2003) encourages the development of conservation agreements/plans and provides certainty about the standard that an individual conservation effort must meet in order for us to consider whether it contributes to forming a basis for making a decision about the listing of a species. PECE applies to “formalized conservation efforts” that have not been implemented or have been implemented but have not yet demonstrated if they are effective at the time of a listing decision.

Under PECE, formalized conservation efforts are defined as conservation efforts (specific actions, activities, or programs designed to eliminate or reduce threats or otherwise improve the status of a species) identified in a conservation agreement, conservation plan, management plan, or similar document. To assist us in evaluating a formalized conservation effort under PECE, we collect information such as conservation plans, monitoring results, and progress reports. The development of such agreements/plans is voluntary. There is no requirement that the individual conservation efforts included in such documents be designed to meet the standard in PECE. The PECE policy is posted on our Candidate Conservation Web site at <http://www.fws.gov/endangered/esa-library/pdf/PECE-final.pdf>.

SUPPLEMENTARY INFORMATION:

Introduction

With this notice, we announce the availability of the final EIS for the refuge. We started this process through a notice in the **Federal Register** (78 FR 48183; August 7, 2013). Following a lengthy scoping and alternatives development period, we published a second notice in the **Federal Register** (80 FR 26084; May 6, 2015) announcing the availability of the draft CCP and draft EIS and our intention to hold public meetings, and requested comments. In addition, EPA published a notice announcing the draft CCP and EIS (80 FR 27950; May 15, 2015), as required under section 309 of the Clean Air Act (42 U.S.C. 7401 *et seq.*). We now announce the final EIS. Under the Clean Air Act, EPA also will announce the final EIS via the **Federal Register**. This notice complies with our CCP policy to advise other Federal and State agencies, Tribes, and the public of the availability of the final EIS for this refuge.

EPA’s Role in the EIS Process

The EPA is charged under section 309 of the Clean Air Act to review all Federal agencies’ EISs and to comment on the adequacy and the acceptability of the environmental impacts of proposed actions in the EISs.

EPA also serves as the repository (EIS database) for EISs prepared by Federal agencies and provides notice of their availability in the **Federal Register**. The EIS database provides information about EISs prepared by Federal agencies, as well as EPA’s comments concerning the EISs. All EISs are filed with EPA, which publishes a notice of availability on Fridays in the **Federal Register**.

The notice of availability is the start of the 45-day public comment period for draft EISs, and the start of the 30-day “wait period” for final EISs, during which agencies are generally required to wait 30 days before making a decision on a proposed action. For more
